FOREWORD

Indian economy has preponderance of informal and unorganised sector both in terms of number of workers and enterprises. Unorganised manufacturing sector has emerged as a highly vibrant and dynamic sector of the Indian economy. UMEs not only play crucial role in providing large employment opportunities at comparatively lower capital cost than large industries but also help in industrialization of rural & backward areas, thereby, reducing regional imbalances, assuring more equitable distribution of national income and wealth. UMEs are complementary to large industries as ancillary units and this sector contributes enormously to the socio-economic development of the country. This segment of economy has inbuilt vulnerabilities, and the study of unorganised sector based on reliable data is important for informed decision making and addressing the problems faced.

DES in its attempt to identify major data gaps relating to unorganized enterprises and unorganized workers and to suggest ways and means for developing statistical data base on unorganized sector with standardized concepts, definitions, coverage and comparability over time and space, designed a survey of the unorganized manufacturing enterprises. The initiative of the task was earlier undertaken under the purview of the 13th FC recommendations to evolve a State Business Register. As a part of the follow up survey the manufacturing units, excluding those registered under factories act were selected by sampling method from the State Business Register.

This report based on the findings of the survey aims at collating the aspects of data base on the profile of the unorganised enterprises in terms of work force, productivity performance, growth, constraints faced vis-a-vis technology measure sustainability as depicted in relevant statistics. An attempt has been made in this paper to present the results pertaining to size in terms of the total number enterprises, employment, fixed assets, operating expenses, receipts, value added, loans, gross value added per worker, characteristics of the enterprises in terms of ownership, social group of owner, type of operation, months of operation, whether accounts maintained, nature of problems faced, etc. and to examine the technical efficiency of unorganized manufacturing sectors of the state. Efficiency levels across different industries/ industry groups have also been examined.

DES takes this opportunity to thank all the informants and organizations that have contributed towards the preparation of the Report. It is our pleasant duty to place on record our deep appreciation of the valuable services rendered by the field staff of DES involved in the survey in accomplishing the task. It also needs to mention that the present report is the outcome of unwavering support of all the concerned staff of DES. A work of this nature, not attempted hitherto, would not have been possible without the formidable support and dedicated involvement of DES personnel.

Any feedback, comment or suggestion for efficacy of the survey report would be highly appreciated. We hope, this report will be useful for the regulatory authorities, policy makers, academicians, planners and other agencies concerned and public at large.

Unorganised Manufacturing Sector in India- Input, Output and Value Added

Executive Summary

(The survey was conducted in whole of the State Uttar Pradesh across all the 75 districts with the use of list frame constituted of the manufacturing enterprises of State Business Register excluding those registered under Factories Act. The list frame was found to have 166008 establishments in number. After resorting to simple random sampling a total of 36417 enterprises were surveyed across the State)

- *The number of unorganised manufacturing enterprises estimated after the survey analysis was 163538.*
- *At State level the broad activity category 'Manufacture of food products'(NIC Div.10) outnumbered in establishment number(25%) followed by the category 'Manufacture of wearing apparel'(NIC Div.14) 16% and 'Manufacture of textiles'(NIC Div.13) 11%.*
- *The survey revealed that Kanpur Nagar had the highest share (7%) in total number of unorganised manufacturing enterprises followed by Agra (6%), Meerut (5%), Allahabad (4%) and Ghaziabad (3%)*
- *A total of about 13,10,194 workers were estimated to be working in unorganised manufacturing enterprises.*
- *At the State level the broad activity category 'Manufacture of wearing apparel '(NIC Div.14) 20% had highest share in total number of workers followed by 'Manufacture of food products'(NIC Div.10) 16.5%, 'Manufacture of other non-metallic mineral products'(NIC Div.23) 13%, 'Manufacture of textiles' (NIC Div.13) 10%, and 'Manufacture of fabricated metal products, except machinery and equipment' (NIC Div.25) 7%.*
- *GB Nagar had the highest share (19.90%) of estimated number of workers of unorganised manufacturing enterprises in India followed by Hardoi (11%), Agra(6%), Kanpur Nagar(6%) and Ghaziabad(5%).*
- *Proprietary enterprises (i.e. enterprises owned by a single household) had dominant share (93%) of unorganised manufacturing enterprises and the rest were operated either on partnership basis or by SHG/Trust or by Others.*

- *The perennial enterprises are those which worked more or less regularly throughout the year. About 93% of the total unorganised manufacturing enterprises were perennial while the seasonal and casual enterprises together constituted 7% of the total number of enterprises.*
- *About 90% of the unorganised manufacturing enterprises were operational the yearlong while about 5% of the enterprises under survey coverage operated for 9 months and the rest 5% remained operational for less than a quarter of the reference year.*
- *At the State level, about 16% of the enterprises were not having any sort of accounts in either banks or post offices.*
- *About 49% of the unorganised manufacturing enterprises were owned by persons belonging to Other Backward Classes (OBC), 43% owned by persons belonging to the category Others, 7% owned by Scheduled Castes and a negligibly small part 0.85% owned by Scheduled Tribes.*
- *The maximum number of enterprises were registered under KVIC (36%) followed by Shop and Establishment Act (33%) and Municipal Corporation (13%).*
- *The enterprises pursuing the broad activity 'Manufacture of Food products' (NIC Div.10) 24% were mostly registered with any of the Acts under consideration followed by the activity 'Manufacture of wearing apparel' (NIC Div.14) 15% and 'Manufacture of textiles' (NIC Div.13) 10%.*
- *At the State level the districts Kanpur Nagar and Agra (7% each) had the most number of enterprises registered with any of the registering authorities followed by Ghaziabad (5%) and then by Meerut and G.B. Nagar (about 4% each).*
- *The enterprises reported to having faced one or the other problem in their day-to-day operation as shortage of raw material (15.34%), non-availability of manpower (11.28%), power supply problem (60.45%), lack of technical awareness (11%).*
- *About 25% of the unorganised manufacturing enterprises had reported of not having received any financial assistance from government. The rest 75% received assistance from the government in form of financial loans.*

- *About 2% of the unorganised manufacturing enterprises under coverage pursued mixed activities. The enterprises engaged in the broad activity category 'Manufacture of Food products' NIC Div.10 (4%) had pursued more mixed activities in comparison to other manufacturing enterprises. The other enterprises having dominance in pursuing mixed activities were 'Other manufacturing' NIC Div.32 (3%), 'Manufacture of fabricated metal products, except machinery and equipment' NIC Div.32 (1.5%).*
- *Gross Value Added (GVA) by unorganised manufacturing enterprises in Uttar Pradesh was estimated as Rs. 9462.43 crores.*
- *Among the Districts, G.B. Nagar had the highest share (20.32%) of aggregate GVA for unorganised manufacturing enterprises under survey coverage of the State.*
- *At State level, GVA per enterprise was estimated as Rs. 578608*
- *At State level, GVA per worker was estimated as Rs.72222*
- *'Raw materials' constituted about 89% of total operating expenses of unorganised manufacturing enterprises.*
- *'Products and by-products manufactured' constituted about 85% of gross receipts of unorganised manufacturing enterprises.*

Chapter : One

Introduction

Chapter One

Introduction

1.1 General

1.1.1 As the primary focus of ISSP is at the State level, the grant of the Thirteenth Finance Commission focused at the development of district level statistical systems. The broad objectives of this grant were to empower and strengthen the system for building the required capacities to collect, compile and disseminate relevant and reliable official statistics for policy making. With these scope and coverage of the grant of XIII-FC and the milestones to be achieved as per guidelines one of the tasks included in the expenditure plan was to prepare a State Business Register.

1.1.2 The Business Register (BR) is continuously-maintained State repository of baseline information on businesses and institutions operating in all the districts of the State. As a statistical register, it provides listings of units and related attributes required for survey sampling frames, data integration, stratification and business demographic statistics. Thus the Business Register contains stratification, collection and response information for the State's businesses. In pursuance of the recommendations of XIII-FC, Business Register of the State Uttar Pradesh was prepared to maintain a complete up-to-date and unduplicated list of all businesses pursuing various economic activities relating to production/distribution of goods and or services registered under 10 identified Acts.

1.1.3 Under the changed circumstances where informal sector is increasingly interlinked with the formal, and plays pervasive role in the economy and in the livelihoods of the people, it is imperative to improve the information base of the unorganized manufacturing sector. DES, in its attempt to access the contribution to input, output, value added in State's unorganized manufacturing sector across districts, conducted a survey in which all the manufacturing enterprises enlisted in Business Register (BR) except those registered under Factories Act served as the survey sampling frame.

1.2 Objective-

The first step in building database on informal sector is to arrive at definitions that reflect the specific characteristics for unambiguous identification of the various components of the sector. Further, it is desirable to specify the core statistics relating to unorganized sector that needs to be collected and disseminated with certain regularity as a part of an ideal statistical system that would ensure reliability and credibility.

Unorganized manufacturing sector accommodates a large portion of workforce who are poor and economically excluded in the developing economies. Indian economy witnessed a rapid economic growth after the adoption of globalization policies in the year 1991. Contribution of unorganized manufacturing sector to the gross domestic product has increased. This sector is generally characterized by low productivity and low efficiency. However increasing importance of this sector makes the efficiency analysis more crucial recently. An attempt has been made in this report to examine the employment generated and contribution to value added of the state's unorganized manufacturing sector across districts. To summarize the objective of the survey may be specifically listed as:-

- i. To examine the existing definitions of informal enterprises and employment and suggest appropriate modifications with specific objective of their amenability towards better measurement.
- ii. To identify major data gaps relating to unorganized enterprises and unorganized workers.

- iii. To review the existing methodologies and arrangements for estimating informal employment and income arising from informal enterprises and suggest modifications.
- iv. To examine the existing databases for estimation of income and employment in informal sector and suggest improvements.
- v. To analyse the present system of data collection relating to informal sector and suggest modification needed in the coverage and content in the existing surveys or new surveys

1.3 Survey Coverage

Unorganised manufacturing sector under the coverage of the survey referred to all manufacturing enterprises, which were not covered by Annual Survey of Industries. All government and public sector undertakings were also outside the coverage of the survey. In terms of National Industrial Classification (NIC) 2008 codes, the survey on unorganised manufacture covered the NIC 3-digit activity codes 101-332. The survey covered whole of the State Uttar Pradesh across all the districts.

1.4 Survey design in brief

- 1.4.1 One salient feature of the sample design adopted during the survey was the use of list frame of the manufacturing enterprises of State Business Register excluding those registered under Factories Act. The list frame hence obtained consisted of 166008 establishments. All these units in the list frame were considered for survey with resorting to simple random sampling without replacement method to capture sufficient number of enterprises to retain the same ratio as its occurrence in the list frame with a view to improving the overall estimate of gross value added per worker, total number of workers, total input, total output, etc.
- 1.4.2 For the purpose the frame data set of enterprises classified under each NIC 3 group was randomized separately for every district. The randomized observations of each of the existing NIC 3 groups of a district were stratified into two subsets or subsamples. Then from each subset of NIC3 groups so formed a sample of 20% or minimum 4 establishments were drawn using simple random sampling without replacement method. This process was repeated in case of all the districts which yielded a total of 36417 establishments as sample list which were canvassed during the survey.
- 1.4.3 Design-based estimates of aggregates for any selected survey characteristic were obtained separately for list frame.

1.5 Sample size and its limitation

Out of 36417 enterprises selected from the list frame, data could be collected from only 26,798 enterprises (for district wise distribution of allotted and surveyed numbers of enterprises as per the list frame, reference may be made to Table 1 at the end of this chapter). Thus 26% of the sample enterprises became casualties (see Chapter four for the reasons for casualties).

It needs to be mentioned that the total sample drawn was about 22% of the list frame but after eliminating the casualty enterprises the actual number of enterprises in operation accounted for 16% of the list frame. The accuracy of the estimation results could be improved if these 6% casualty cases were included in the survey.

1.6 Layout of the present report

- 1.6.1 This report contains four Chapters (including the present introductory one), and three Appendices. Chapter two deals with the concepts and definitions of various terms used in the survey on unorganised manufacturing enterprises. Chapter three discusses the main findings of the survey – primarily on input, output and value added – based on the data collected by the field staff of DES. Chapter four discusses the limitations of the survey and also gives certain suggestions for future surveys based on the experiences gathered. Detailed tables are presented in Appendix A. The sample design and estimation procedure is included in Appendix B while facsimile of the schedule of enquiry and economic activity description code is given in Appendix-C.

Chapter : Two

Concepts and Definitions

Chapter Two

Concepts and Definitions

- 2.1 Enterprise:** An enterprise unit is a business unit comprising one premise or multiple premises, engaging in one kind or multiple kinds of economic activities, deciding its own business strategies and use of funds, etc., possessing business account books, and bearing responsibility for its own profits or losses.
- 2.2 Establishment:** Establishments consist of individual premises engaging in the production or sale of goods or the provision of services, regardless of whether they are financially independent. Examples include a factory, a store, and a restaurant.
- 2.3 Manufacturing Enterprise:** The enterprises engaged in the manufacture or production of goods pertaining to any industry specified in the first schedule to the industries (Development and regulation) Act, 1951) or employing plant and machinery in the process of value addition to the final product having a distinct name or character or use. The Manufacturing Enterprise are defined in terms of investment in Plant & Machinery.
- 2.4 Unorganised Manufacturing Enterprise:** The unorganised manufacturing sector for the present survey consists of following types of enterprises:
- (i) All manufacturing enterprises except those registered under section 2m(i) and 2m(ii) of Factories Act, 1948 and Bidi and Cigar Workers (conditions of employment) Act, 1966.
 - (ii) All manufacturing enterprises except those run by Government (Central Government, State Governments, Local Bodies) / Public Sector Enterprises.
- 2.5 Own-account Enterprise:** An enterprise, which is run without any hired worker employed on a fairly regular basis, is termed as an own account enterprise. If such an enterprise is engaged in manufacturing and/or repairing activities, it is termed as Own Account Manufacturing Enterprise (OAME).
- 2.6 Enterprise Ownership-**
- 2.6.1 **Proprietorship-** A sole proprietorship, also known as the sole trader or simply a proprietorship, is a type of enterprise that is owned and run by one natural person and in which there is no legal distinction between the owner and the business entity.
 - 2.6.2 **Partnership-** A type of business organization in which two or more individuals pool money, skills, and other resources, and share profit and loss in accordance with terms of the partnership agreement. In absence of such agreement, a partnership is assumed to exist where the participants in an enterprise agree to share the associated risks and rewards proportionately.
 - 2.6.3 **Self-Help Group (SHG)-** Self-Help Group refers to self-governed, peer controlled, informal group of people with same socio-economic background and having a desire to collectively perform common purposes. SHG aims at covering all aspects of self-employment, organization of the rural poor into self Help groups and their capacity building, planning of activity clusters, infrastructure build up, technology, credit and marketing. It lays emphasis on activity clusters based on the resources and the occupational skills of the people and availability of markets.
 - 2.6.4 **Trust -** A trust is a structure where a trustee carries out the business on behalf of the trust's members (or beneficiaries). A trust is not a separate legal entity. A trustee may be an individual or a company. The trustee is legally liable for the debts of the trust and may use its assets to meet those debts. However, if there is a shortfall the trustee is responsible for the difference. A trust is set up through a trust deed and there are two main types: discretionary or unit trusts. In a discretionary trust, the trustee has discretion in the distribution of funds to each beneficiary. In a unit trust, the interest in the trust is divided into units with their distribution determined by the number of units held by each member.

2.7 Operational nature of Enterprises-

- 2.7.1 **Perennial Enterprise:** Enterprises, which usually operate more or less regularly throughout the year, are called perennial enterprises.
- 2.7.2 **Seasonal Enterprise:** Seasonal enterprises are those which are usually run during a particular season or fixed months of a year.
- 2.7.3 **Casual Enterprise:** Casual enterprises are those which operate occasionally (may be disjoint periods of time throughout the year) but total number of days operated in the last 365 days is 30 days or more.

2.8 Worker: A worker is defined as one who participates either full time or part time in the activity of the enterprises. The worker may serve the enterprise in any capacity - primary or supervisory. He/she may or may not receive wages/ salaries in return to his/her work incidental to or connected with the entrepreneurial activity.

- 2.8.1 **Formal hired Workers-** Formal working refers to ordinary employment arrangements where employees have an explicit or implicit contract, meaning that they can expect to work scheduled hours with defined job responsibilities and expectations. They are employed on a continual basis, earn a specific wage for their work. Formal working arrangements can be full time or part time, with or without benefits beyond wages, such as health insurance or a pension plan.
- 2.8.2 **Informal hired Workers-** In an informal working arrangement, there's no contract, either expressed or implied, between the employer and the worker. Workers are not employed on a continual basis and have no scheduled hours; instead, they work day to day or job to job. They typically don't have consistent duties, and the pay offered may vary according to the task to be done. Informal workers never get benefits beyond their wages do.
- 2.8.3 **Self Employed:** Persons who are engaged in their own farm or non-farm enterprises are defined as self-employed. There are different types of self-employed persons. Some may operate their enterprises without hiring any labor. Other normally work on their own but occasionally hire a few labourers. There is also a third category who by and large regularly run their enterprises by hiring labour. The first two groups of self-employed are known as 'own-account workers' and the third as 'employers'.
- 2.8.4 **Other worker/helper:** This includes all persons belonging to the household of the proprietor or households of the partners who are working in or for the enterprise without regular salary or wages. Persons working as exchange laborers in the enterprises without salary or wages will also be covered in this category. All unpaid household workers/helpers who are associated with the activities of the enterprise during the reference month are considered against this category.

2.9 Fixed assets: Fixed assets mean assets of an enterprise in the form of land, building and other construction, plant and machinery, transport equipment, tools and other fixed assets (new or used) that have a normal economic life of more than one year from the date of acquisition i.e., through outright purchase/ hire purchase / loan/ mortgage/ and / or construction, irrespective of their use at the time of survey. Market value of the fixed assets owned by the enterprises as on last day of reference year has been considered for the purpose of this report. The hired component of fixed assets is present market value of the assets used by an enterprise but not owned by it.

2.10 Gross value added: Value added represents that part of production which is the actual contribution of an enterprise to the economy. Value added is calculated by deducting total expenditure from the Gross receipts during a reference period under the Product approach. Factor Incomes namely salaries/wages, rent, interest and profit are added up to arrive at the Gross value added under Factor Income approach. In both the cases Payable/Receivable approach was adopted.

2.11 Establishment Types- An enterprise which is employing at least one hired worker on a fairly regular basis is termed as establishment. Paid or unpaid apprentices, paid household member/servant/resident worker in an enterprise are considered hired workers.

Establishments have further been categorised into two types: non-directory and directory.

2.11.1 **Non-directory Establishment:** An establishment employing less than six workers (household and hired workers taken together) is termed non-directory establishment. If such an establishment is engaged in manufacturing activities, it is termed Non-Directory Manufacturing Establishment (NDME).

2.11.2 **Directory Establishment:** A directory establishment is one which has employed six or more workers (household and hired workers taken together). If such an establishment is engaged in manufacturing activities, it is termed Directory Manufacturing Establishment (DME).

2.12 Reference Period: The reference period for recording details of various items depended primarily on whether the enterprise under survey could provide information from their books of accounts, or they could provide information orally.

Case 1: Enterprises that provided information by recollection

Here, three kinds of reference periods were used to collect data in different blocks of the schedule viz. reference month, reference year and last date of the reference month.

2.12.1 **Reference Month:** This reference period was used to collect data on various receipts and expenses as well as value added, employment, emoluments, rent and interest payments for the enterprises providing oral information.

For perennial and casual enterprises, 'Reference Month' referred to the last 30 days (preceding the date of survey) irrespective of the number of days of operation.

For seasonal enterprises, consider the following two cases-

- **Type 1:** Working continuously for 30 days or more (including scheduled holidays) in the current season: - 'Reference Month' referred to the last 30 day (preceding the date of survey).

- **Type 2:** Worked for less than 30 days in the current season: - 'Reference Month' referred to an average month in the last working season.

If an enterprise was unable to provide information for the last 30 days, but could provide it for the latest completed calendar month, this calendar month was considered as 'Reference Month'.

2.12.2 **Reference Year:** For items like net additions to fixed assets owned, number of months operated, number of other economic activities pursued etc., data were collected for the entire 'Reference Year'. It was last 365 days preceding the date of survey, if 'reference month' of that enterprise was 'last 30 days'. For the enterprises where 'reference month' was 'last calendar month', 'reference year' was last 12 calendar months taken together. For seasonal enterprises of case 2 above (i.e., seasonal enterprises which had operated for less than 30 days during the current season), 'Reference Year' was a continuous period of 365 days starting from the first day of the corresponding working season.

2.12.3 **Last date of the reference month:** For some of the items like value of fixed assets, amount of loan outstanding, etc., the reference period used was as follows:

It was last date of the 'Reference Month', which was the same as the last date of the 'Reference Year'. However, opening stock of semi-finished goods manufactured, opening stock of goods traded were collected for the beginning of the first day of the 'Reference Month'.

Case 2: Enterprises provided data from their books of accounts

2.12.4 In this case, two kinds of reference periods were used to collect data in different blocks of the schedule, 'Reference Year' and 'last date of the reference year'.

2.12.4.1 **Reference Year:** This was the last completed accounting year of the enterprise under survey. Various receipts, expenses, value added as well as employment, emoluments, rent, interest, net

additions to fixed assets owned, for the enterprises were recorded for the last completed accounting year.

2.12.4.2 **'as on first/ last date of reference year'**: For some of the items like value of fixed assets, amount of loan outstanding, etc., this reference period was used. It was last date of the 'Reference Year'. For items like opening stock of semi-finished goods manufactured, opening stock of goods traded, the beginning of the first date of the reference year was the point of reference.

2.13 Mixed Activity: There are enterprises that carry out a number of activities simultaneously. For example, a bakery may also sell cold drinks, a rice mill may sell sugar, a factory may run a hospital in its premises, etc. Each such activity was treated as a separate enterprise if information for them was separately available. If the accounts were not separable then the data pertained to the enterprise as a whole and the enterprise was classified as having mixed activities and the activities of such enterprises are a mixture of NIC's. The activities may be mixed at any level of NIC, but for the present survey an enterprise was considered to have mixed activities if its activities were different at 2-digit level of NIC-2004. The appropriate NIC in such cases was determined on the basis of major activity. Major activity refers to the activity which yielded maximum income/turnover/employment. The above criteria were applied in the given order, i.e., income first, then turnover and then employment, to determine the major activity.

2.14 Multiple Activity: Since many of the entrepreneurs belonging to the unorganised sector operate at small or marginal levels, the phenomenon of carrying out more than one activity simultaneously or at different points of time is quite prevalent. If the activities were carried out at one point of time at the same location and the information was not separately available, then it was taken as "mixed activity". Carrying out of more than one economic activity by the entrepreneur during the reference year is called multiple activities. *It differs from mixed activities in the sense that former is with respect to the entrepreneur whereas the latter is with respect to the enterprise.* However, an entrepreneur of a manufacturing enterprise manufacturing woolen garments before winter and cotton clothes before summer will not be considered as carrying out multiple activities. Some examples of multiple activities are: i) a person carrying out agricultural activity at sowing / harvesting season and doing carpentry at the same time or at other times, ii) a lady working as regular wage / salary earner and also running a tailoring shop in the evening, etc iii) A household servant is making paper envelopes in free time, iv) An agricultural worker engaged in handicraft making during non-harvesting season of the year.

2.15 Working on Contract: The enterprises in the unorganised sector are mainly small units. In many cases, the enterprises are seen to be working as per orders from a bigger unit. In such cases, certain conditions are put on the servicing unit by the contractor or master unit. Conditions may pertain to sale of products, supply of raw materials, mode of payment etc. In many cases, the contractor specifies the design of the product to the servicing unit e.g. garment manufacturing, shoe manufacturing etc. If the surveyed enterprise had undertaken any work on contract during the reference year, it was considered as 'enterprises working on contract'.

2.16 Land and Building: Land means the land on which the enterprise is accommodated together with the surrounding area, which is used for the enterprise. This also includes improvement to land. However, if only a portion of the land belonging to the residence of a household is utilised for the enterprise, only that portion of the land is considered as capital assets for the enterprise. Land owned with permanent heritable possession with or without right to transfer the title comes under this category. Land held on long-term lease, say, 30 years or more, is also treated as land owned. Building is the structure, where activities of the enterprise are undertaken. This also includes all other structures like shed, house, portions of a house or other structure, building under construction and other conveniences in which the activities of the enterprise are carried out. This also includes other constructions such as passage, wall, water tank, sewerage, tube-well, etc.

- 2.17 Plant and Machinery:** Plant generally means an assembly of machinery /equipment / devices installed for the operation of entrepreneurial activities. Machinery means an implement or mechanical device used in the entrepreneurial activities. These are assets of durable nature and can be easily identified.
- 2.18 Transport Equipment:** All vehicles, power-driven or man / animal-driven, used for transporting persons, goods and materials by the enterprise in connection with its activity are covered in this category. Animals, if used for drawing vehicles or carrying loads, will be treated as part of transport equipment.
- 2.19 Tools and Other Fixed Assets:** Tools refer to small loose implements, generally held in hand for operation and having normal life of more than one year. Other fixed assets refer to other durable equipment which is used for the entrepreneurial activity either directly or indirectly. These include furniture, fixtures, laboratory equipment, office equipment etc. Livestock used in oil-mill is also covered under this category.
- 2.20 Net additions to fixed assets during the last 365 days:** Net addition to fixed assets was obtained by subtracting depletion of assets from the additions made during the last 365 days. Addition to the fixed assets could be made through purchase (new or used) or through own construction. Improvements on land, new construction of building, shed, structure, as well as assets produced on own account during the last 365 days was considered as additions to the fixed assets. Depletion of assets was obtained by considering the assets sold and discarded during the last 365 days. The value of assets disposed of in any manner other than sale, were treated as value of assets discarded. Besides obsolescence (gone out of use) of an asset, this included loss due to theft, damage, accident etc.
- 2.21 Loan:** Any borrowing in cash or kind to be repaid in cash or kind is treated as loan. Loans taken for the purpose of utilising the same in the entrepreneurial activities of an enterprise were considered even if such loans were used for other purposes. On the other hand, loans taken for other purposes but ultimately used in the enterprise were excluded.
- 2.22 Operating Expenses:** The total of values of raw materials, electricity, fuel, lubricants and auxiliary materials consumed; cost of maintenance, services purchased and other expenses incurred during the reference period by an enterprise was considered as 'operating expenses'.
- 2.23 Receipts:** The sale value of products and by-products manufactured by an enterprise together with the value of services rendered to other concerns and other receipts incidental to entrepreneurial activities are considered as 'total receipts'.
- 2.24 ASICC code:** ASICC stands for "A Standard Industrial Commodity Classification" It had been developed first by the Industrial Statistics wing of the Central Statistical Organisation with the primary objective of having a uniform non industry specific input /output coding structure. The National Sample Survey Organisation had adopted this for use in the 56th round as well as in the 62nd round survey on unorganised manufacturing enterprises. Unlike the ASICC code used by CSO, the ASICC code used by National Sample Survey Organisation does not have any specific unit of quantity associated with the codes. However, tables giving ASICC code-wise (at two-digit level) break-up of input and output had been generated mainly to cater to the requirements of National Accounts Division (NAD) of Central Statistical Organisation (CSO) and are not included in the report in view of the size of these tables. However, soft copy may be made available to all users as per the policy of the government.

Chapter : Three

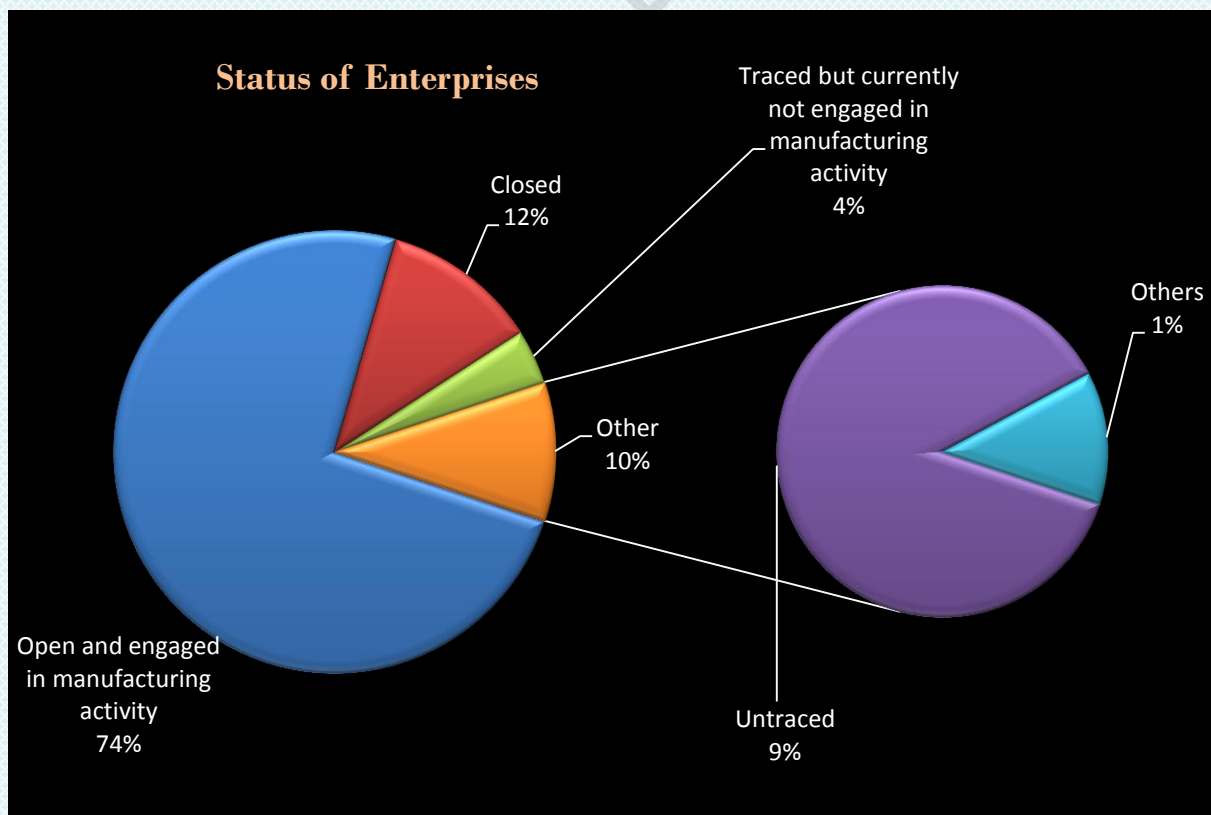

Summary of Findings

Chapter Three

Summary of findings

3.1 General

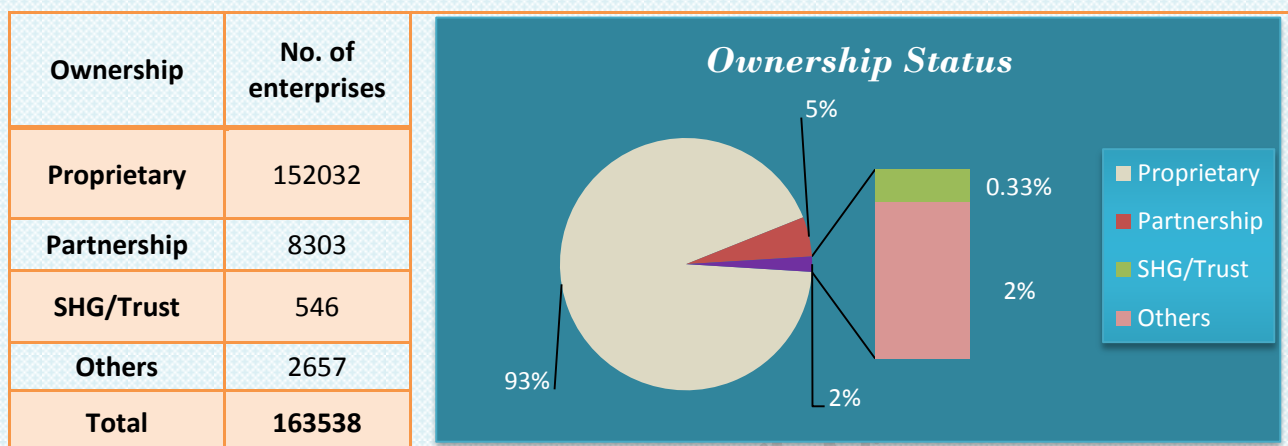

- 3.1.1 The revelations of the findings based on the survey data is presented to focus the operational characteristics of the enterprises, employment, assets and borrowings of the enterprises but the present report mainly lays stress on input, output and gross value added during the survey period by the enterprises in the unorganised manufacturing sector in Uttar Pradesh.
- 3.1.2 Tables included in the text of this report highlight selected relevant survey findings and are expressed in percentages. The base for each table in all enterprises is n= 26798 , unless otherwise noted. Analysis of the survey data identifies key points about the expenses and earnings of the enterprises which goes to determine the gross value added .
- 3.1.3 The number of enterprises selected from the frame of 1,66,008 enterprises generated from the State Business Register was 36417, out of which 36022 enterprises could be surveyed. The status of operation (refer Table 1) of the enterprises was found to be as follows-
Open and engaged in manufacturing activity- 26798 , Closed- 4123, Traced but currently not engaged in manufacturing activity - 1440, Untraced- 3188 , Others- 471

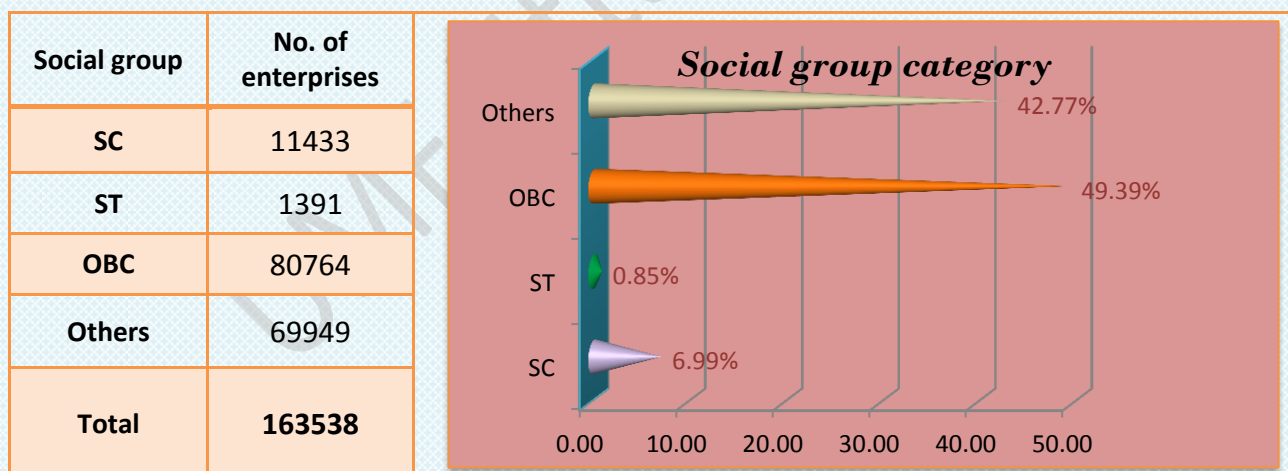

3.1.4 The estimated number of unorganised manufacturing enterprises in Uttar Pradesh during the survey period was 163538.

3.2 Basic Survey Results

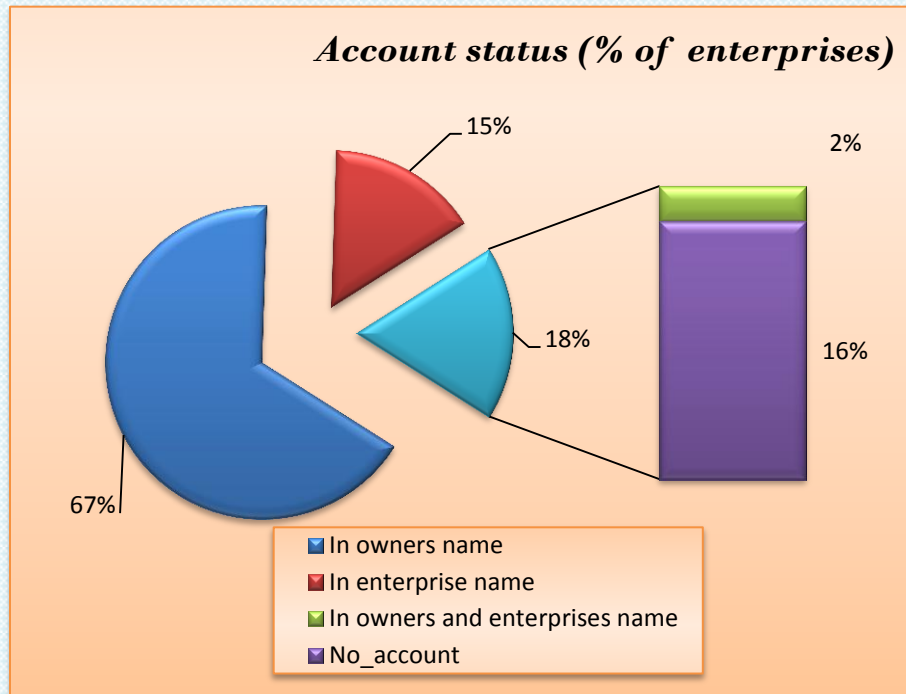

3.2.1 **Status of Ownership** - The percentage distribution of enterprises by nature of ownership shows that most of the enterprises (more than half) were proprietary in nature (93%) and the least were SHG/Trust (0.33%) as revealed by table 2.

3.2.2 **Social Group Category**- Table 3 reveals that the numbers of enterprises run by the social group category 'OBC' (49%) had dominance over those run by other social group categories while the social group category 'ST' (0.85%) had the least value (0.85%).

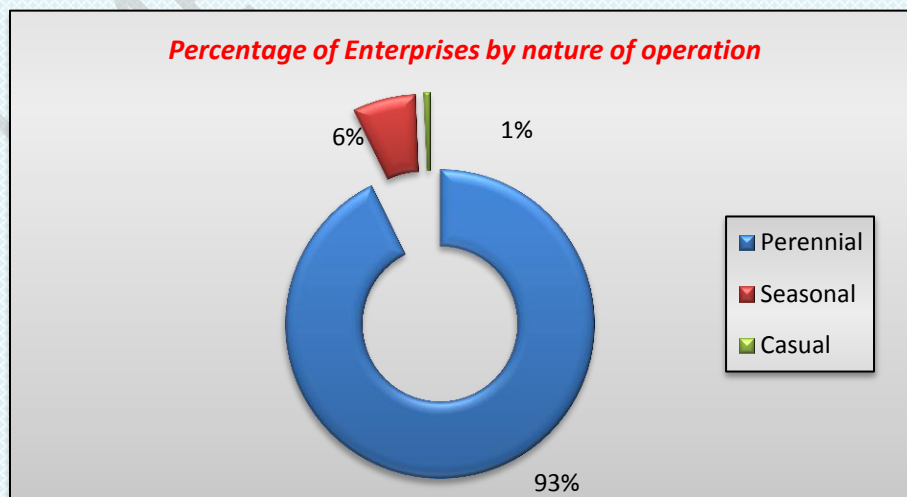

3.2.3 **Status of accounts maintained-** The survey data (see table 4) reveals that about 84% of enterprises have accounts in either banks or post offices. These accounts, as informed by the respondents were 67% in owner's name, 15% in enterprise's name and 2% in both owner and enterprise name. Only 16% of the operating enterprises had no account in either banks or post offices. The status is depicted in the graph below-

3.2.4 Status of Operation - Table 5 reveals operational nature of a very large number of enterprises (93%) was yearlong i.e. perennial in nature, just 7% had seasonal operation while 0.64% operated casually.

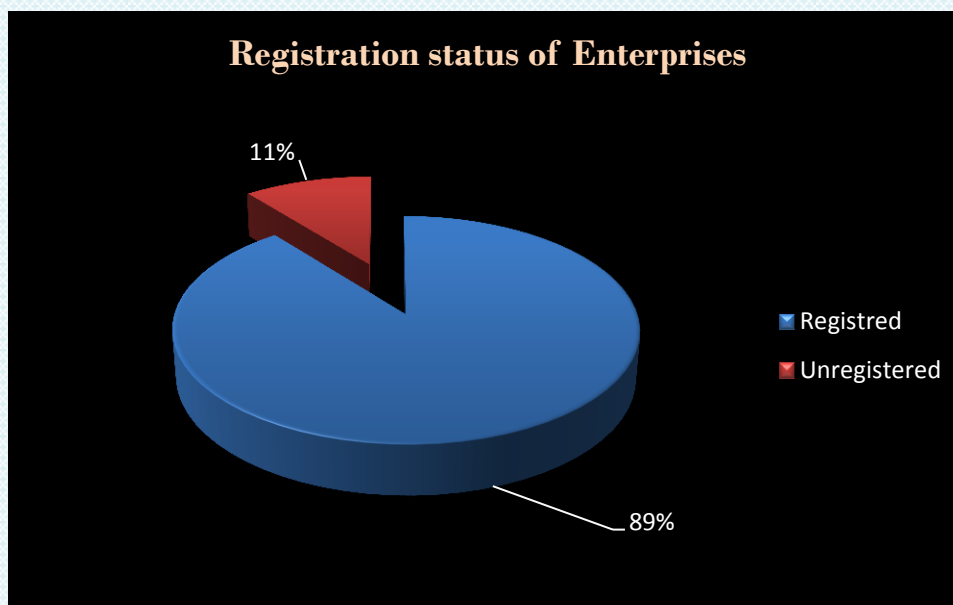

Perennial	Seasonal	Casual	Total
151658	10840	1041	163538

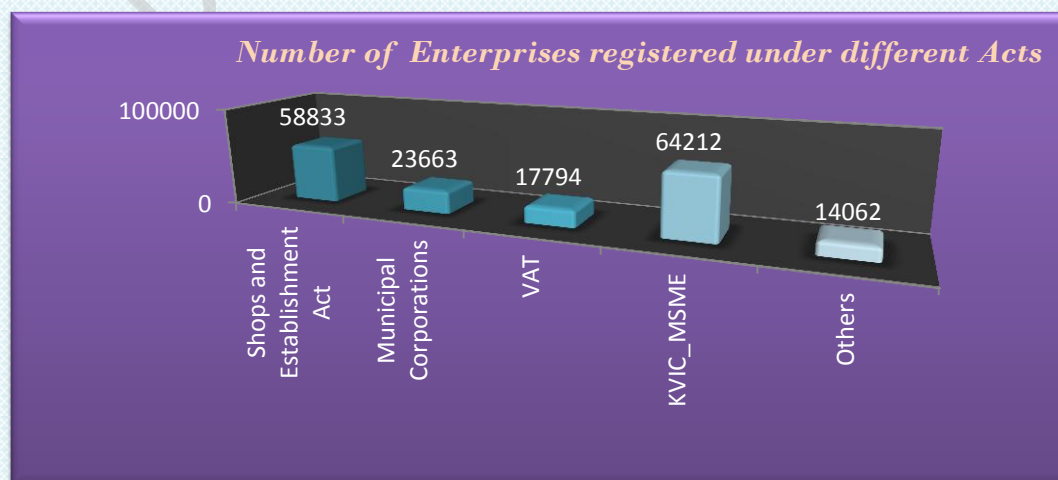

3.2.5 Usage of computer and internet-About 17 % of surveyed enterprises reported the use of computers in their activities and 16% reported to have access to internet. (Refer table 6.1)

3.2.6 **Registration Information-** It is observed from table 7 that 89% of the enterprises were registered under certain Acts while 11% of the enterprises were not registered under any Acts. Most of the enterprises as revealed by table 8.1 were registered under KVIC-MSME (64212) followed by Shops and Establishment Act (58833) and the least were registered under 'Others'(14062)

Registered	Unregistered	Total
146156	17382	163538

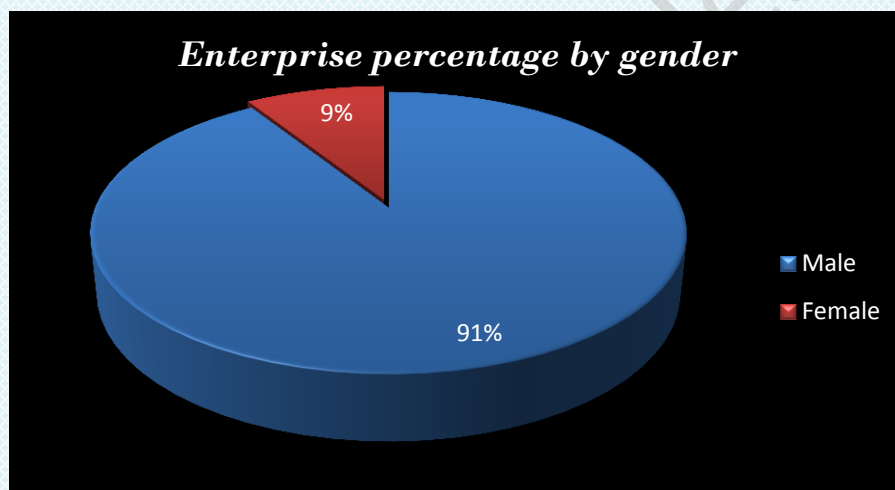

Acts	Shops and Establishment Act	Municipal Corporations	VAT	KVIC_MSME	Others
No. of enterprises	58833	23663	17794	64212	14062

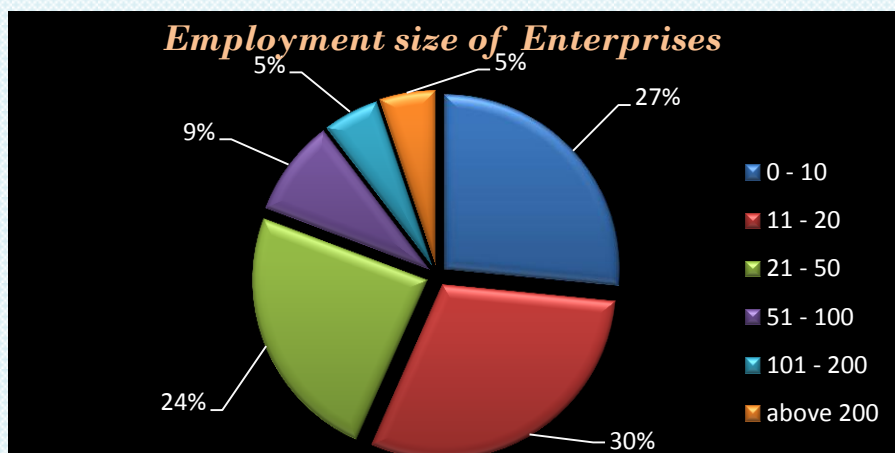

3.3 Distribution of enterprises by number of workers in the enterprise

- 3.3.1 In this report distribution of total number of workers engaged in unorganized manufacturing activity by gender, worker type, by employment size is presented. (Details in Table 9 of Appendix A)
- 3.3.2 Although each enterprise engaged about 8 workers on an average, a study of the distribution of all enterprises by number of workers engaged by them reveal that the enterprises varied substantially in size in terms of number of workers employed by them.
- 3.3.3 The number of male workers engaged to female workers bears the percentage share 91% and 9% respectively. Nearly 30% of the enterprises had employment size 11 to 20 and about 27 % of the enterprises were of employment class size 0 to 10 and about 10% of the enterprises engaged above 100 workers .

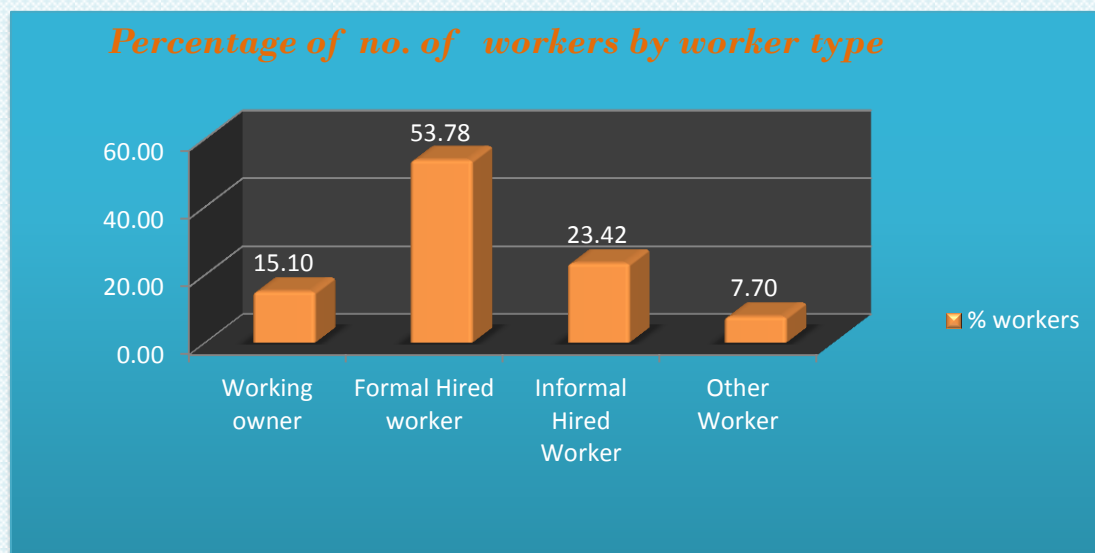

Gender	Male	Female	Total
Workers	1192174	118020	1310194

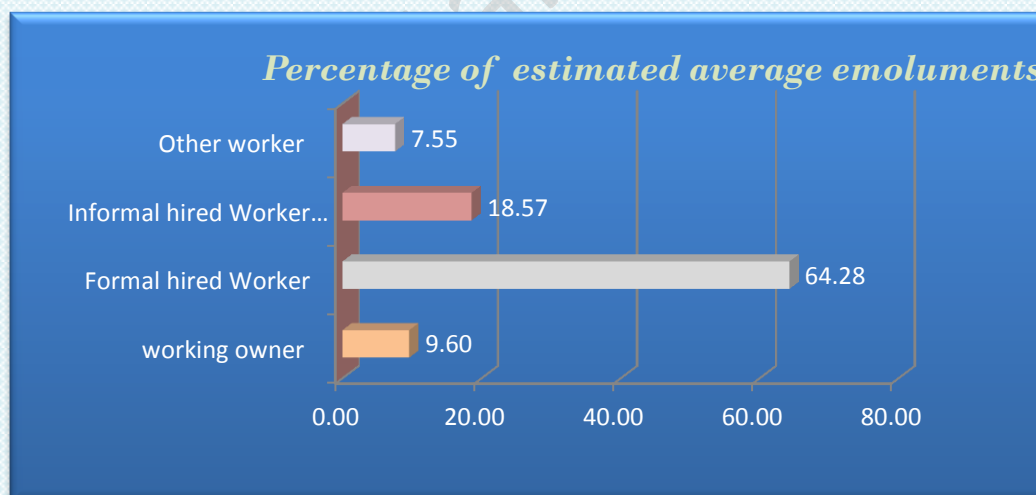

Employment size	0 - 10	11 - 20	21 - 50	51 - 100	101 - 200	above 200	Total
Number of Enterprises	43311	49254	39307	14568	8471	8408	163319

3.3.4 Taking into account the number of workers engaged in the enterprises formal hired workers were found to be engaged maximum 54% followed by informal hired workers 24%, working owner 15% and other workers 7.70% (table 9)

3.3.5 Analyzing the salary distribution it is seen that 64% salary is drawn by formal hired workers and the least by other workers 7.55%. (Refer Table 10)

3.4 Operating expenses and receipts

3.4.1 Table 11.3 and Table 12.3 of Appendix A presents in detail annual value of key characteristics, including those of operating expenses and receipts of the enterprises by NIC code and by district. It may be mentioned that operating expenses include value of raw materials/electricity/fuel consumed, cost of maintenance, services purchased and other expenses incurred during the reference period. Receipts include sale value of products/by-products manufactured, value of services rendered to other concerns, and other receipts incidental to entrepreneurial activities.

3.4.2 At the State level, the estimated annual value of operating expenses and receipts per enterprise was about Rs. 5680.72 crores and Rs. 15510.63 crores respectively.

3.4.3 There were wide variations in the average value of operating expenses and receipts per enterprise over industry divisions/NIC codes. The average values were significantly higher for NIC code 106 (Manufacture of grain mill products, starches and starch products), 141(Manufacture of wearing apparel, except fur apparel), 259 (Manufacture of other fabricated metal products; metalworking service activities), 222 (Manufacture of plastics products), and 202 (Manufacture of other chemical products).(Table 11.3)

3.5 Share of various items in total operating expenses and total receipts

3.5.1 It would be useful to know the percentage shares of various individual items in total operating expenses and total receipts. Details are available in Tables 13 and 14. The share of raw materials consumed in total operating expenses along with the share of products and by-products manufactured (including change in stock of semi- finished goods) in the total receipts are presented in Statement 1 and Statement 2 for different industries. Raw materials consumed and products and by-products manufactured had the most dominant share in total operating expenses and total receipts respectively for almost all industries. The percentage shares for the same at State level were about 89.40% and 87.93% respectively.

Statement-1

Items of expenditure	Raw material used	Other electricity charges	Other Travelling freight cartage	Other Fuel and lubricants	Other Minor repair maintenance	Other Charges other concern	Other Financial charges	Other Communi cation expenses	Other For own consu mption	Other Rental on fixed assets	Total operating expenses
Total operating expenses (in crores)	5079.00	207.95	114.54	99.92	60.10	40.42	36.43	19.69	11.49	11.18	5680.72
%	89.40	3.66	2.016	1.76	1.06	0.71	0.64	0.34	0.20	0.19	100

Statement-2

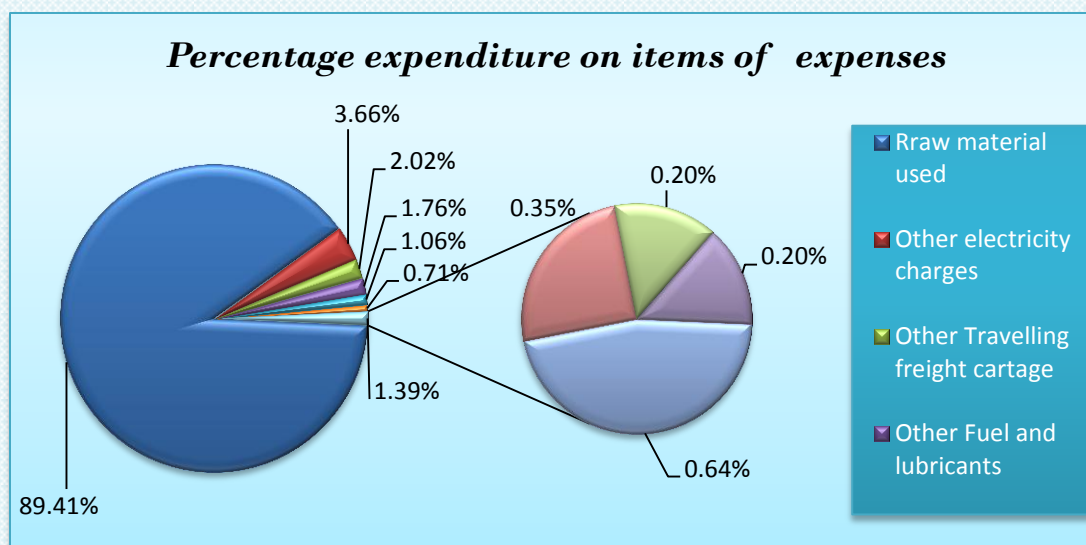

Items of Receipts	Main product by product	Receipts from manufacturing	Sale of goods purchased	Receipts from Others
% share	90.11	4.55	4.31	1.03

3.5.2 The share of raw materials in operating expenses was the highest (94.62%) in 'other manufacturing' (NIC Div32) and was the lowest (79.033%) for 'manufacture of beverages' (NIC Div.11) as given below in Statement 3

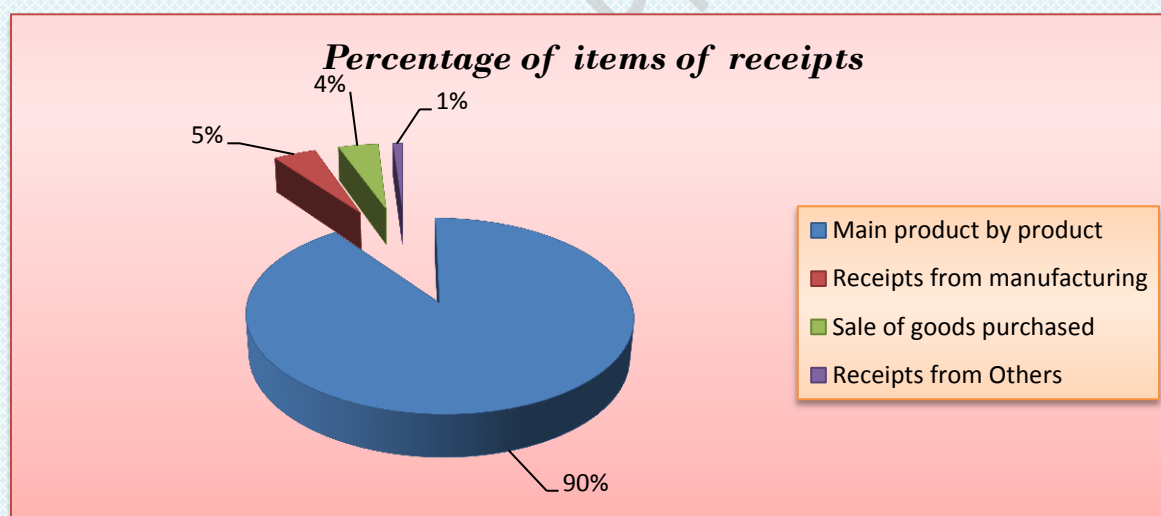

Statement-3

nic2	Principal raw material used	Total operating expenses	%of raw material to operating expenses
32	3027867933	3199945563	94.62
19	38085265	40598731	93.81
33	577226780	621022314	92.95
16	659267502	715532186	92.14
13	2814193343	3070370713	91.66
31	708375831	775979373	91.29
18	1254041244	1386092391	90.47
25	5698356772	6309464138	90.31
10	8583682616	9578171556	89.62
15	2775227584	3097038170	89.61
20	2899786040	3240041784	89.50
27	1839080274	2064940768	89.06
17	1938891308	2183302265	88.81
26	688467364	779558080	88.32
28	1761395939	1997257993	88.19
24	2253957284	2556208676	88.18
22	3641044685	4143844801	87.87
23	2204298328	2521400205	87.42
21	1424964200	1654084175	86.15
12	293235033	341575754	85.85
30	92940372	108282097	85.83
14	4552172226	5314884753	85.65
29	677393437	794231819	85.29
11	247695001	313403112	79.03

3.5.3 Statement 1 gives the percentage shares of various items in total operating expenses of enterprises separately. As already mentioned, 'raw materials consumed' had the most dominant share in total operating expenses – its percentage share being 89.40% for the state. Considering the percentage shares of all the items of expenses, it is seen that apart from raw materials (89.40% share in operating expenses), the second major expenditure was incurred on electricity charges for work (3.66%) followed by Other Travelling freight cartage (2.016%), other fuel and lubricant (1.758%), Other Minor repair maintenance (1.05%), and so on.

3.5.4 Percentage shares of items of gross receipt of enterprises separately are presented in Statement 2. As expected, for each sector, 'products and by-products manufactured' had the most dominant share in gross receipts. At the State level, apart from 'products and byproducts manufactured (90.11% share)' other major components of receipts were 'receipts from manufacturing (4.55% share)' followed by 'sale of goods purchased (4.31% share)' and 'receipts from others (1.03% share)'

3.6 Aggregate gross value added (GVA)

3.6.1 Table 15 and Table 16 gives estimates of annual gross value added (GVA) per enterprise by NIC code and also by district. Aggregate annual gross value added by enterprises was estimated as Rs.94,62,43,97,718 and number of workers engaged in all 163538 enterprises was estimated as 1310388 (refer Table 17). Utilising the above information, GVA per enterprise and GVA per worker has been derived. The interpretation of the data (Statement 4) reveals that percentage share of GVA is highest for NIC Div. 10 (18.55%) and least for NIC Div. 19 (0.049%) while percentage share of worker was greatest for NIC Div.14 (19.72%)and least for NIC Div.19 (0.105%)

Statement-4

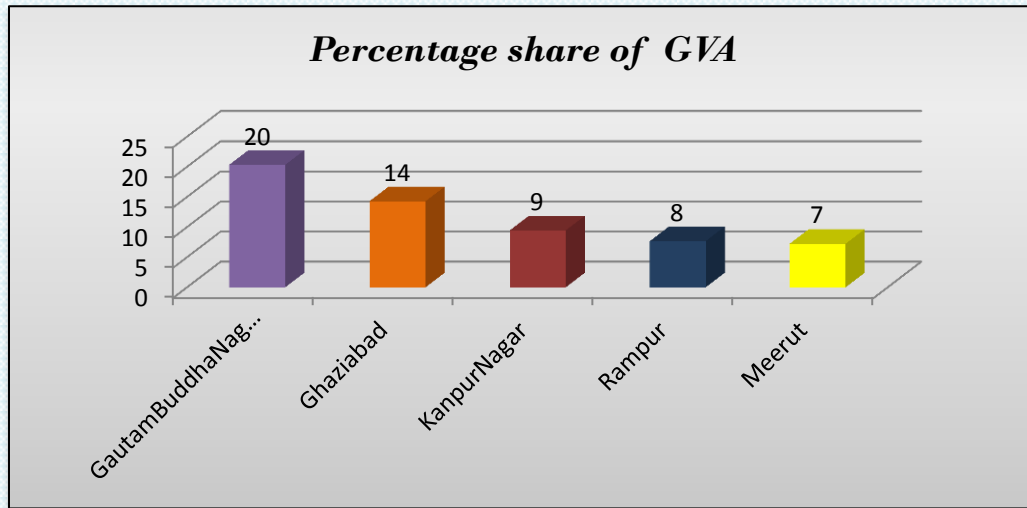

Table 17: Percentage distribution of Gross Value Added (GVA) and Worker of enterprises by Broad Activity Category

NIC 2-digit code	No of enterprises		Sample no of worker	Total		Average		Percentage Distribution	
	Sample	Estimated		GVA	Worker	GVA/ Worker	GVA/ Enterprise	% share of GVA	% share of total worker
1	2	3	4	5	6	7	8	9	10
10	9354	43431	66117	17560802001	217212	80846	404338	18.56	16.58

33	972	4452	13133	527364163	19401	27182	118456	0.56	1.48
Total	36417	163538	352850	94624397718	1310194	72222	578608	100.00	100.00

3.6.2 Table 18 gives district-wise aggregate annual GVA at the time of survey, It is seen Gautam Buddh Nagar, Ghaziabad, Kanpur Nagar, Rampur, Meerut were the top five districts in terms of aggregate GVA in all the survey period. Statement 5 gives the percentage share of top state in aggregate GVA.

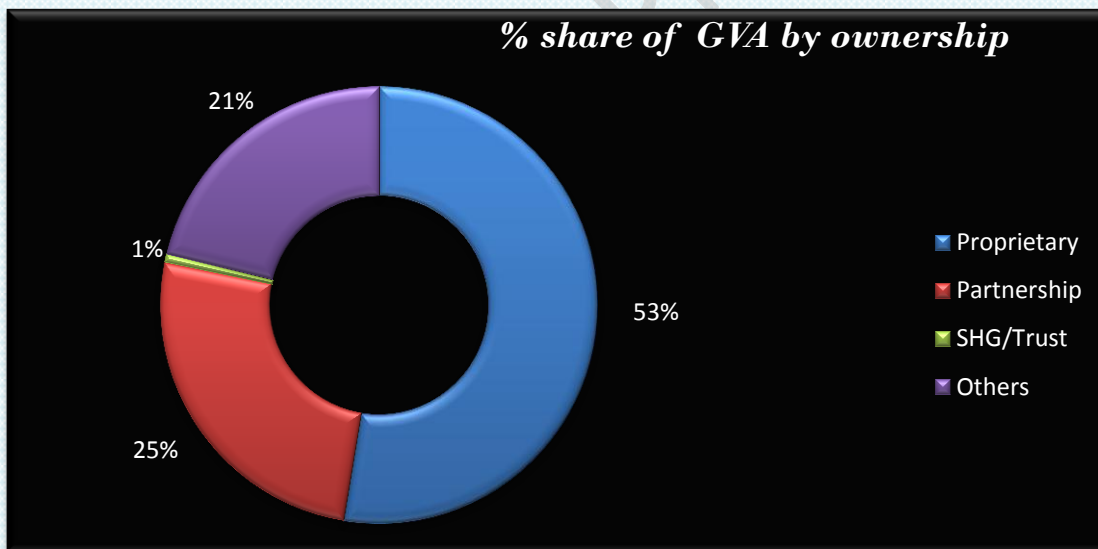

Statement 5

S.No.	1	2	3	4	5
District Name	Gautam Buddh Nagar	Ghaziabad	Kanpur Nagar	Rampur	Meerut
% share of GVA	20	14	9	8	7

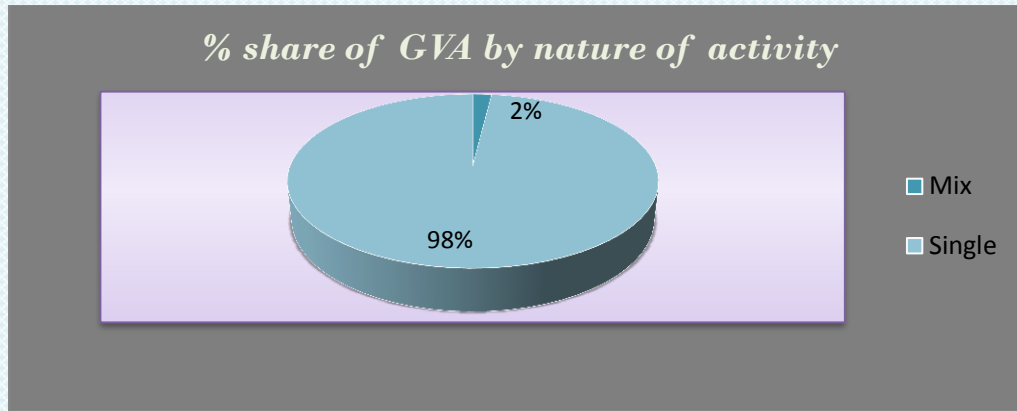

Estimated GVA of Establishment by Nature of ownership-

3.6.3 Table 19 shows the percentage distribution of annual GVA by nature of ownership of the enterprises. Major contribution (more than half) to GVA had come from the enterprises proprietary in nature (53% to aggregate GVA) and the least from SHG/Trust (1%) as revealed in the graph below-

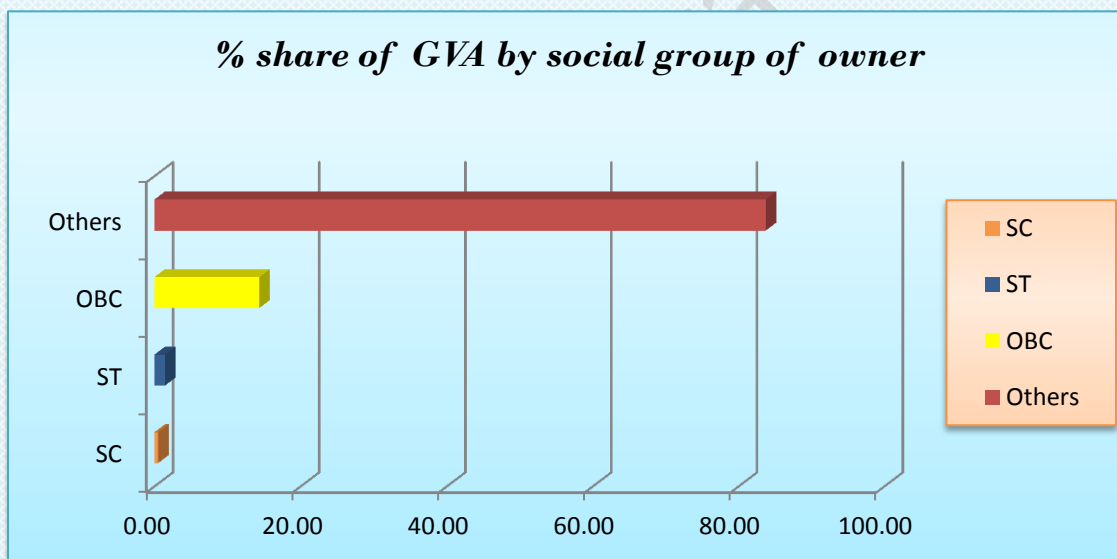

Estimated GVA of Establishment by Nature of activity-

3.6.4 Table 20 shows the percentage distribution of annual GVA by nature of operational activity of the enterprises. It is seen that GVA of the enterprises which pursued single activity i.e. income coming from the surveyed enterprise only (98% to aggregate GVA) was much higher than the same for those enterprises pursuing multiple activities (2% to aggregate GVA).

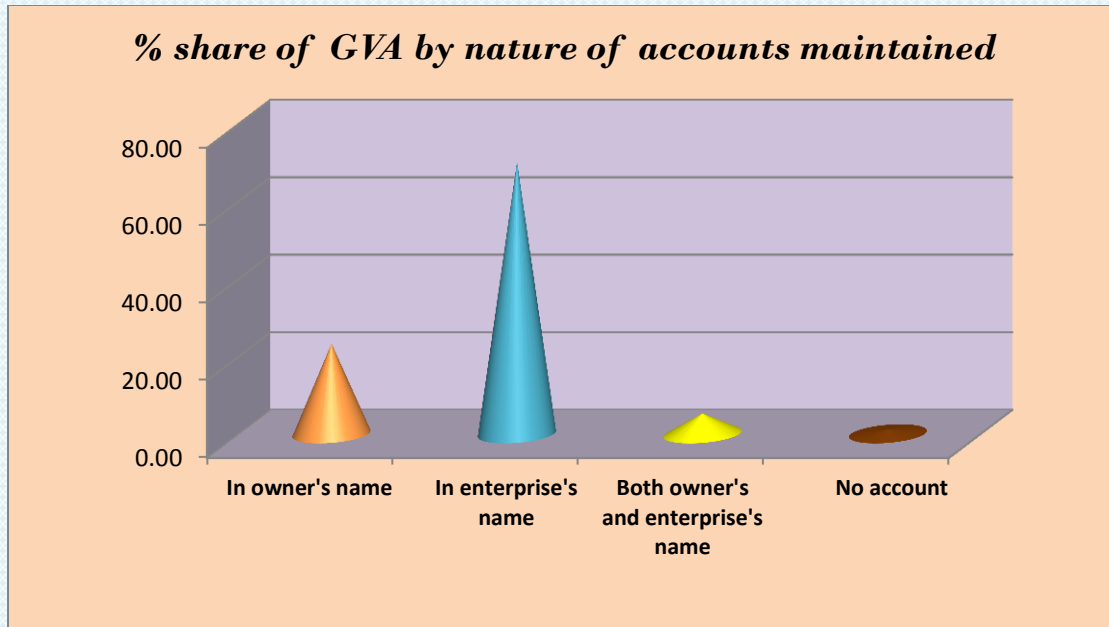

Estimated GVA of Establishment by Social group Category-

3.6.5 Table 21 reveals that the percentage share of annual GVA of the enterprises run by the social category 'others' (84%) had dominance over those run by other social group categories.

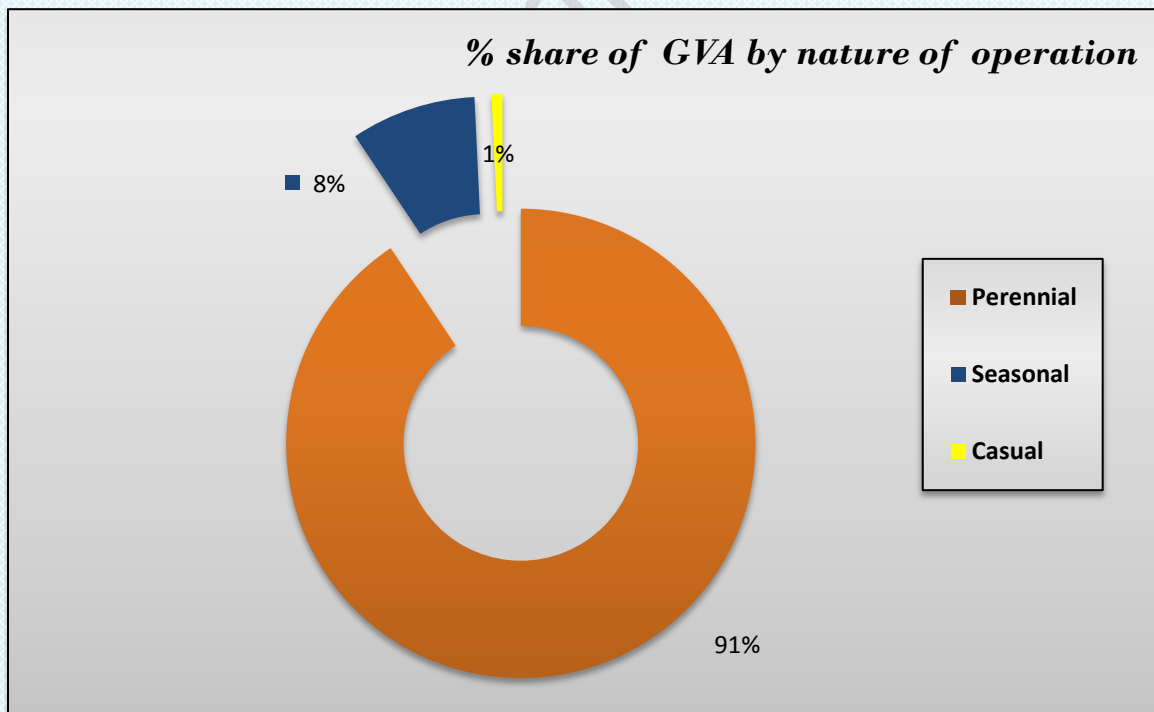

Estimated GVA of Establishment by Nature of accounts maintained-

3.6.6 An analysis of the estimated average annual GVA for the broad categories of enterprises by nature of accounts maintained (see Table 22 for details) reveals that GVA for the enterprises maintaining accounts in enterprise's name (70% of the total share) was considerably higher among all other types. However GVA of enterprises maintaining no accounts were found to be least (1% of total share)

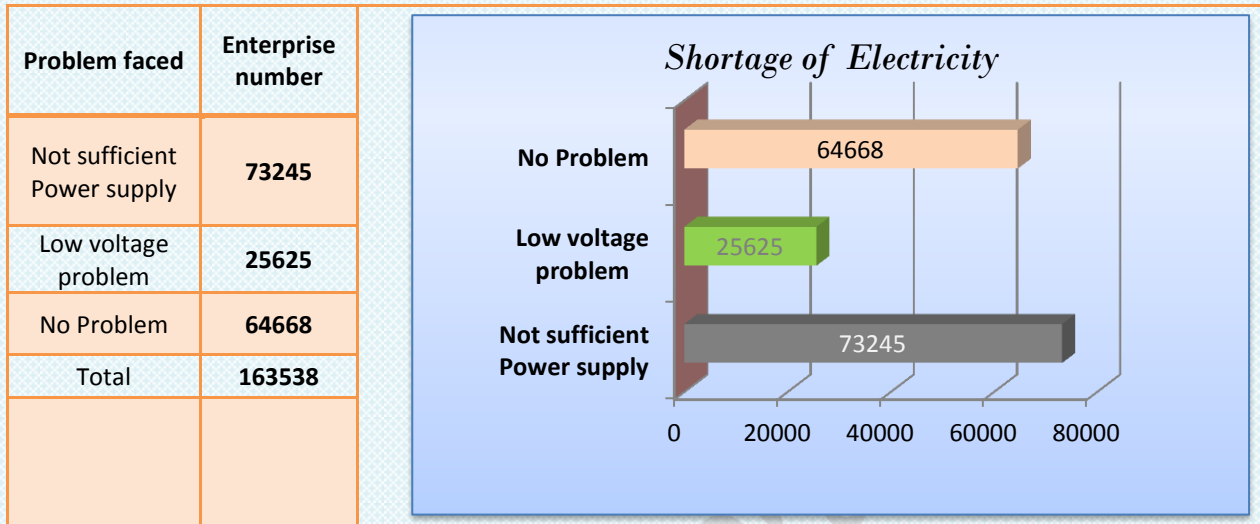

Estimated GVA of Establishment by Nature of Operation

3.6.7 Analysis of the estimated average annual GVA by nature of operation reveals that a large majority (91%) of the enterprises was perennial enterprises and the remaining were seasonal and casual enterprises with percentage share of GVA 8% and 1% respectively. (Table 23)

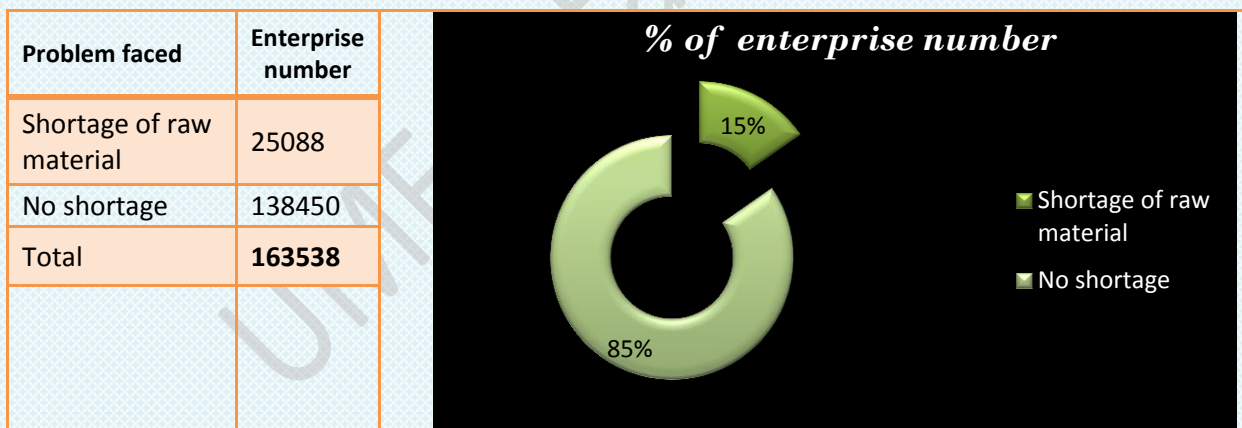

3.7 Problems and constraints in running of enterprises-

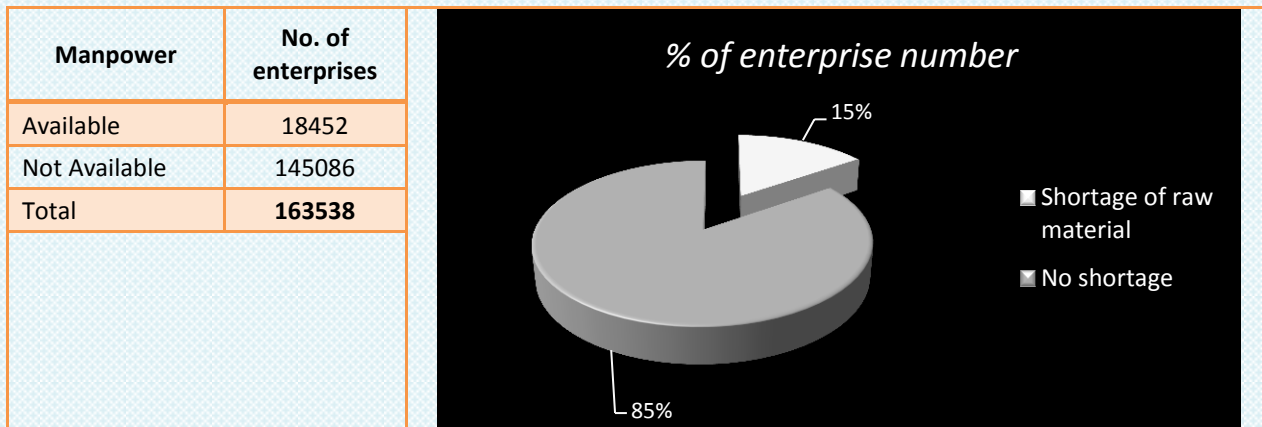

3.7.1 Electricity- The survey data reveals that about 45% enterprises reported to have insufficient power supply while 16% had low voltage problem. However 49% of the enterprises had no such issues (refer Table 24).

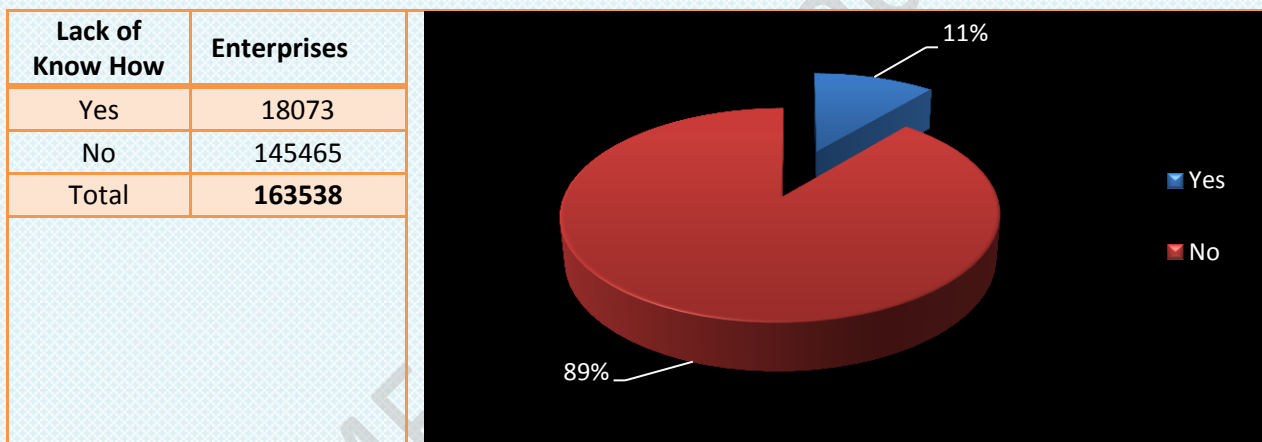

3.7.2 Raw Material -According to the informants 15% of enterprises faced shortage of raw materials to manufacture their products.(see Table 25)

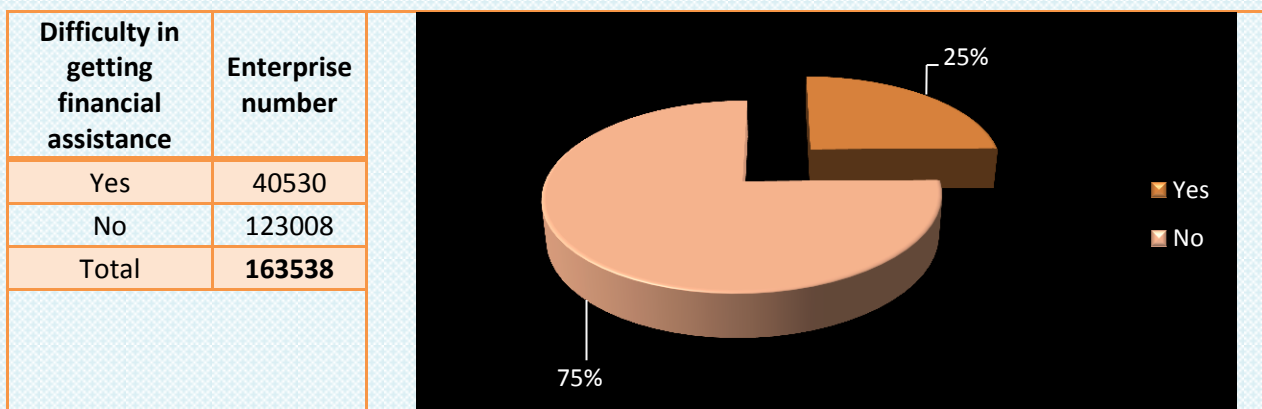

3.7.3 Manpower - Non availability of manpower was reported by respondents in case of 89% enterprises while to the rest 11% manpower was available. (see Table 26)

3.7.3 Technical awareness- Survey data suggests that respondents of 11% of the enterprises admitted that lack of know how adversely effects the proper running of the enterprises but respondents for the remaining 89% enterprises were in denial. (see Table 27)

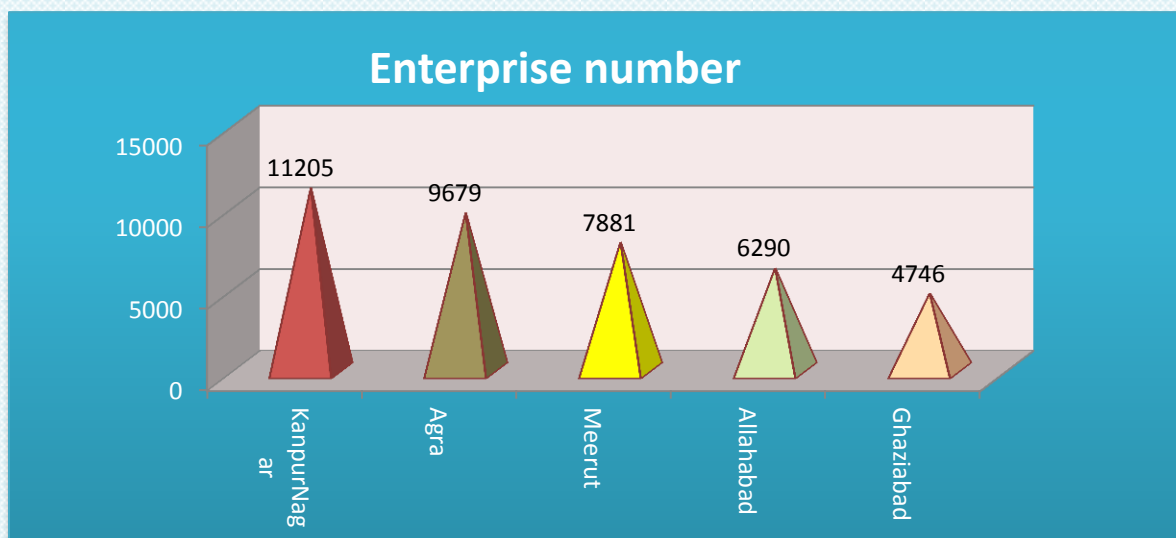

3.7.4 Financial assistance-The survey findings also reveal that 25% of enterprises have little access to finance, particularly to bank financing which thus hampers their emergence and eventual growth.(refer table 28)

3.8 Analysis by Districts of the State-

3.8.1 Enterprise Number- The District wise distribution of the working unorganised enterprises is given in Table 29. The ranking of top five districts in terms of number of working enterprises were found to be Kanpur Nagar, Agra, Meerut, Allahabad and Ghaziabad. Among these Kanpur Nagar had the highest number 11205 and least number of enterprises in the State existed in Hamirpur District with enterprise number just 282.

3.8.2 Activity pursued by enterprises- The survey findings (refer table 30) revealed that 3008 enterprises were engaged in mixed activity whereas 160530 enterprises pursued single activity.

Mixed Activity-The most number of enterprises pursuing mixed activity was found in Meerut, 520 in number followed by Badaun 228 and the least being 5 in both Bijnor and Sonbhadra and about 23 districts were not having any such enterprises.

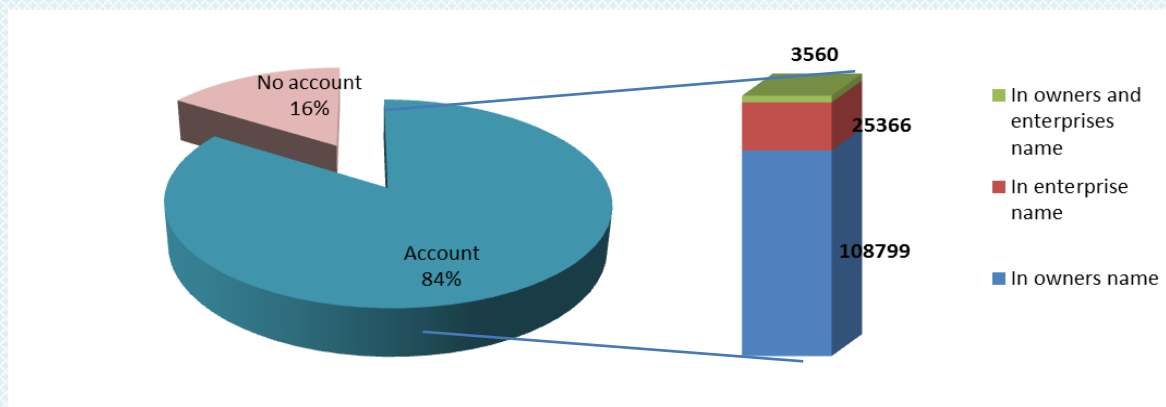

Single Activity-The district Kanpur Nagar was found to be leading in number of enterprises pursuing single activity with enterprise number 11205 followed by Agra 9679. Hamirpur district with 282 enterprises trailed the list.

3.8.3 Ownership of Enterprises- One of the principal characteristics of an enterprise is the kind of ownership it has and which, in turn, indicates the levels of entrepreneurship of the persons running the enterprise. The graph below gives the distribution of unorganised manufacturing enterprises by type of ownership of the enterprises categorized by type of enterprise. Proprietary enterprises (i.e. enterprises owned by a single household) were highest in number (152032) followed by 8303 enterprises operated on a partnership basis and 2657 by 'Others'. Only 546 enterprises were operated by SHG/Trusts. (refer table 31)

The top districts on the basis of ownership was found to be as below in statement 6-
Statement 6

Ownership	Proprietary	Partnership	SHG/Trust	Others
Leading districts	Kanpur Nagar	Ghaziabad	Azamgarh	GB Nagar
Enterprise number	10607	1062	74	1283

3.8.4 Nature of account with financial institutions- To facilitate financial transactions and to access financial services at affordable cost, an enterprise may have one or more accounts registered with financial institutions. It is seen that a large number of enterprises (84%) have accounts with either banks or post offices; only 16% do not have accounts with any financial institution. On the basis of the information provided by the respondents 79% of the accounts of the enterprises were in the name of the proprietor/major partner, 18% in the name of the enterprise and only 3% were in name of owner as well as enterprise. (Refer table 32)

The top districts on the basis of account status was found to be as below in Statement 7

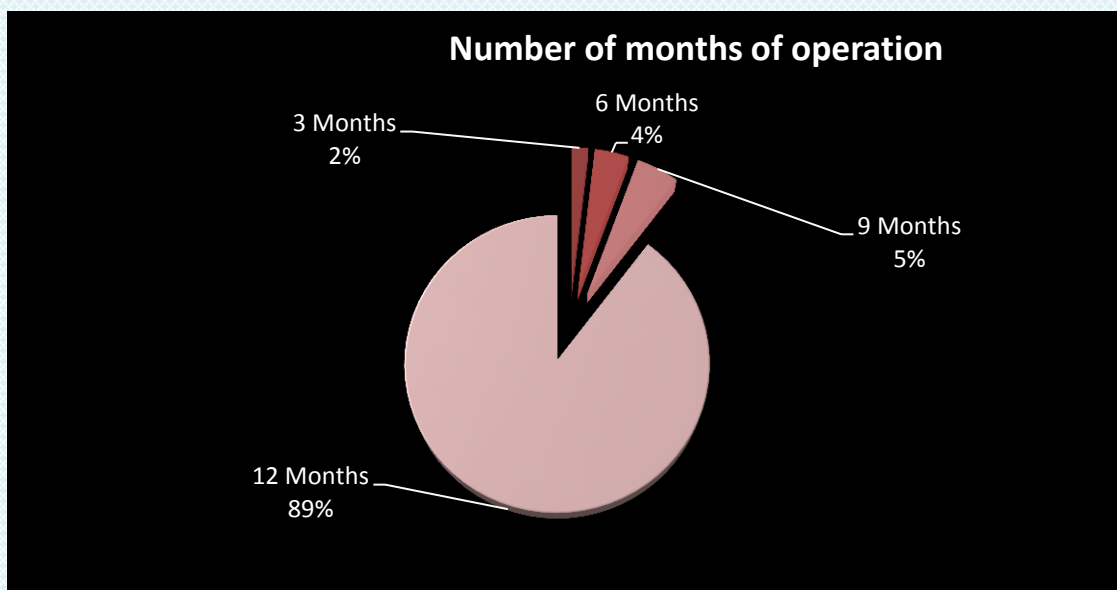

Statement 7

Account Status	In owner's name	In enterprise's name	In owner's and enterprise's name	No account
Leading districts	Kanpur Nagar	Ghaziabad	Kanpur Nagar	Agra
Enterprise number	7926	3712	439	2631

3.8.5 Nature of operation- All the enterprises in the unorganised sector do not generally operate throughout the year. The number of months of operation of an enterprise largely depends on the type of activity it carries out. A small section of enterprises operate only in seasons when the raw materials for the enterprise are available or certain services are in demand in the season. Broadly, an enterprise may operate more or less throughout the year or in seasons or intermittently throughout the year and accordingly they are termed as perennial, seasonal and casual enterprises, respectively. The distribution of enterprises by the nature of operation of the enterprise is depicted in the graph below. About 98% of the total enterprises were perennial that operated throughout the year. The seasonal and casual enterprises constituted only 6% and 1% of the total enterprises respectively. (Refer table 33)

3.8.6 Number of months operated- The distribution of enterprises by number of months of operation during the last 365 days is shown in the graph. As expected, about 89% of the perennial enterprises had operated for more than 9 months during the last 365 days. About 4% of the seasonal enterprises

had operated for 6 months or less during the period. As for the casual enterprises, their distribution over the number of months of their operation was about 2%.(refer table 34)

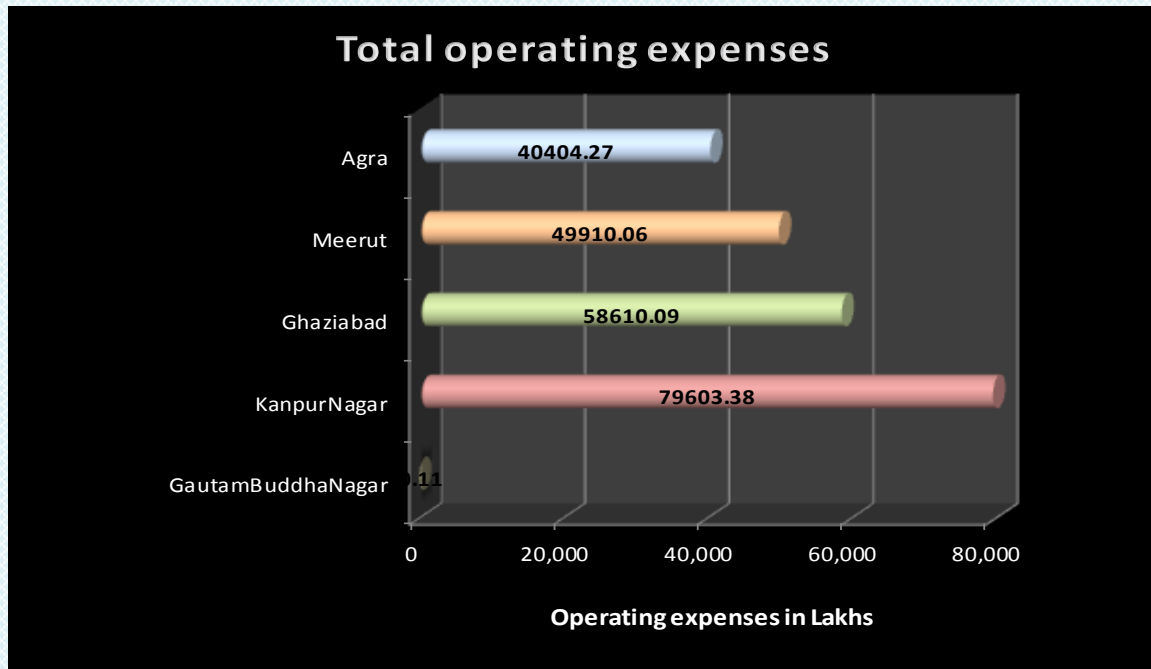

3.8.7 Status of registration- Enterprises in the unorganised sector usually do not get themselves registered with the appropriate authorities. The distribution of enterprises by their status of registration (under/with any Act/Authority) has been given in the graph. A good proportion 89% of the total enterprises were registered with some registration agency. The percentage of enterprises registered under KVIC was maximum with 36% registration, 33% were found to be registered under Shops and Establishment Act and the rest 13% under Municipal Corporations, 10% under VAT and 8% under 'Others'. (Refer table 35)

District wise analysis reveals the following registration status of the top Districts in reference to enterprise number registered with the Acts under consideration is given in statement 8 below.

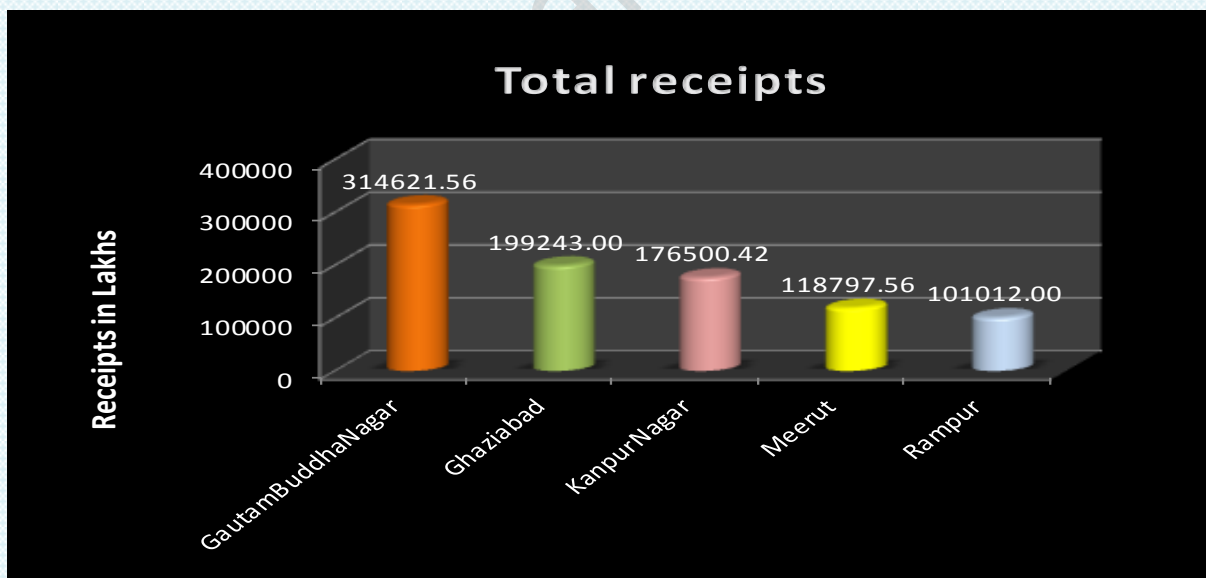

Statement 8-

Acts	Leading District by registration	Enterprise number	% of enterprises existing in respective districts
Shops and Establishment Act	Kanpur Nagar	5490	44%
Municipal Corporations	Agra	3116	25%
VAT	Ghaziabad	3186	37%
KVIC- MSME	Agra-	7685	62%
Others	G.B. Nagar	1753	25%

3.8.8 Total Operating Expenses-The top 5 districts in terms of total operating expenses are G.B. Nagar, Kanpur Nagar, Ghaziabad, Meerut, Agra. These districts account for about 20%, 14%, 10%, 9%, and 7% of the total operating expenses of the State respectively.(Details in Table 36)

3.8.9 Total Receipts- The five dominant districts of the state in terms of total receipts in the unorganised manufacturing sector are G.B Nagar, Ghaziabad, Kanpur Nagar, Meerut and Rampur. The percentage share of these districts in the total aggregate receipt of the State is about 20%, 13%, 11%, 8% and 6% respectively. (Details in Table 37)

3.8.10 Average number of workers- Table 38 gives the estimated number of workers in descending order in Districts. It is seen that G.B. Nagar had the highest share (20%) of workers in unorganised manufacturing enterprises of the state followed by Hardoi (10%), Agra(6%) and Kanpur Nagar(6%), closely followed by Ghaziabad(5%).

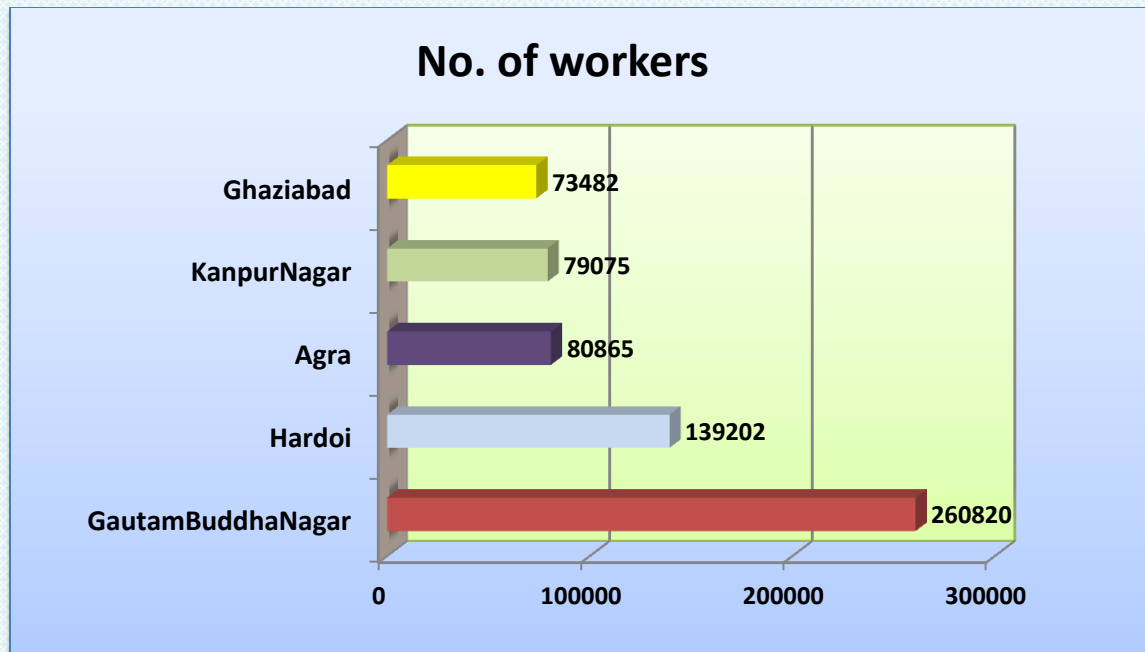

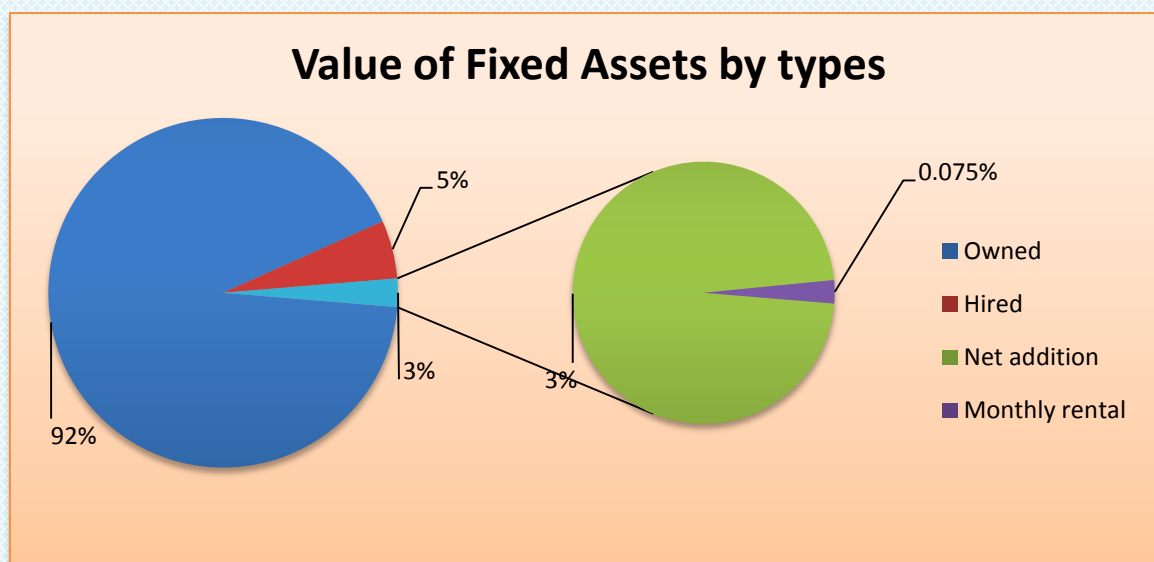

Table 38 gives the estimated number of workers engaged in unorganised manufacturing enterprises by gender and nature of employment. It is seen that males had outnumbered females in the state. The proportion of male workers in in the leading district G.B. Nagar was 87%, the remaining 12% being female workers where the total number of workers was as high as 260820 while in the trailing district Hamirpur the ratio of male to female was 93% and 6% ,the total number of workers just being 550.

The analysis by nature of employment by district reveals that Kanpur Nagar (14271) had maximum working owners; G.B. Nagar had dominance of formal hired workers (219973) and informal hired workers (28325)

3.9 Value of key characteristics-

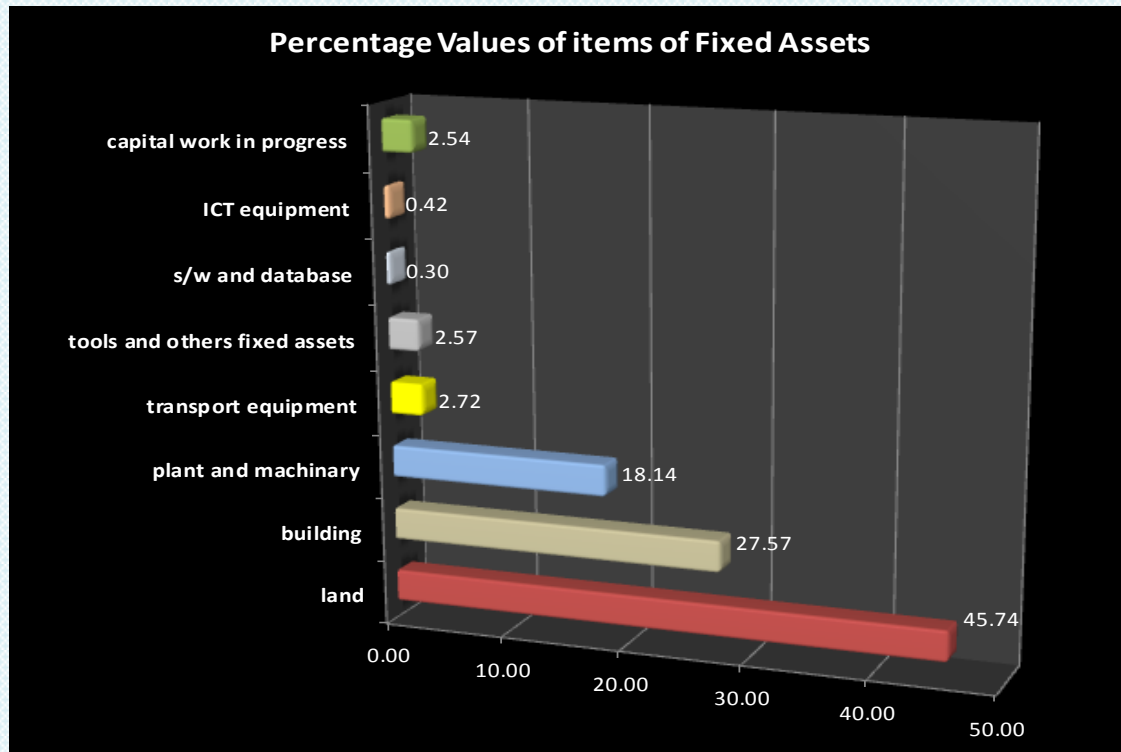

3.9.1 Value of fixed assets- The graph presents the estimated value of total fixed assets of all types possessed by the enterprises. At the State level, the estimated market value of owned assets per enterprise was estimated as Rs. 3533971 and that of hired assets was Rs. 476742. The market value of owned assets was about 92% of total assets used by unorganised manufacturing enterprises, the hired assets constituted about 5%, net addition to fixed assets had a share of about 2% and a very low share of 0.075% of total assets used was monthly rental assets.(refer Table 11.2)

3.9.1.1 Activity wise value of fixed assets- Table 11.2 gives value fixed assets owned, hired, net addition to fixed assets and monthly rental assets industry-wise in descending order. It reveals that 'manufacture of wearing apparel' (NIC Div. 141) had highest fixed assets owned (83%) as well as hired assets (15%). However, 'manufacture of other fabricated metal products' (NIC Div. 259) had the highest percentage (8%) of 'net addition to owned fixed assets' and 'manufacture of non-metallic mineral products' (NIC Div. 239) had highest fixed rental assets (0.40%)

3.9.1.2 District wise value of fixed assets- Table 40 gives market value of fixed assets per enterprise (owned and hired) by type of assets district-wise. It reveals that amongst the districts G.B. Nagar was the leading one with respect to value of fixed assets. The district had the highest fixed assets owned, hired as well as monthly rental assets. However, Moradabad had the highest 'net addition to owned fixed assets' among major districts.

3.9.2 Percentage distribution of items of fixed assets- The graph shows the percentage distribution of estimated market value of fixed assets per enterprise as on date of survey by type of assets for enterprise type. It reveals that 'land and building' was the major constituent (73%) of fixed assets used in unorganised manufacturing enterprises. Besides 'land and building', 'plant and machinery' (18%) was the only item having noteworthy share in the total fixed assets owned and hired. All remaining fixed assets including 'software and hardware' constituted 8% of total owned and hired fixed assets of all enterprises. (Refer Table-39)

3.9.2.1 Activity wise items of fixed assets- Table 45 reveals that per enterprise value of items of fixed assets owned and hired industry-wise. It reveals that 'manufacture of food products' (Ind. Div.10) had highest value of fixed assets owned and hired per enterprise in 'land', 'building' and 'plant and machinery'. However, enterprises pursuing 'manufacture of computer, electronic and optical products'(Ind. Div.26) had highest value in the constituent 'software and database' of fixed assets while enterprises engaged in manufacture of other non-metallic mineral products'(Ind. Div.23) had highest value in item 'transport' of fixed assets.

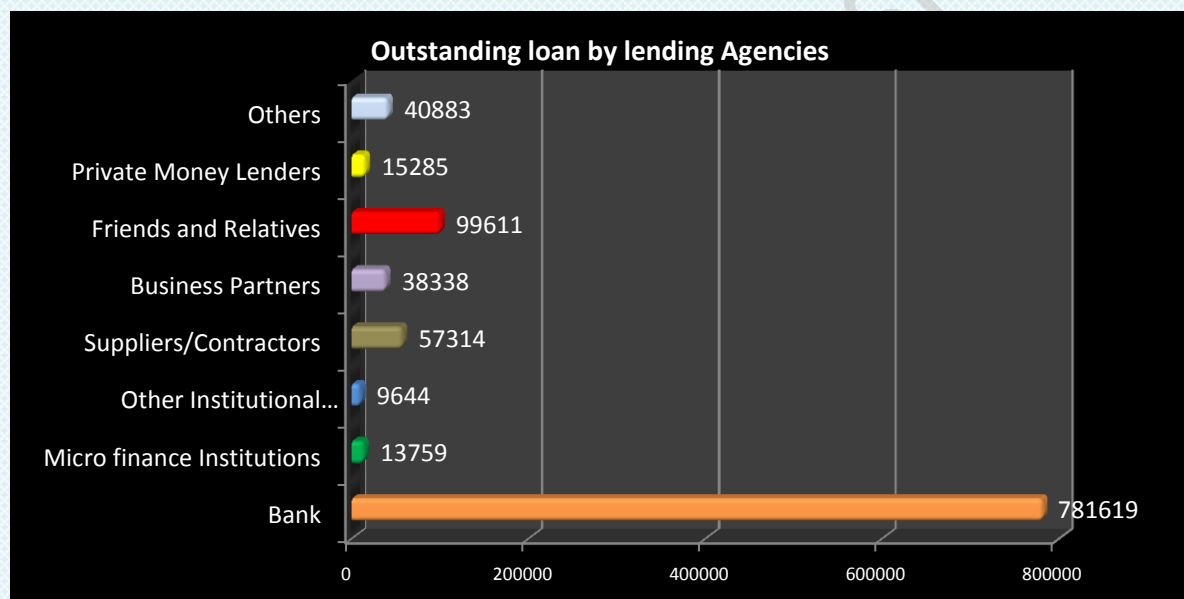

3.9.2.2 District wise value of items of fixed assets- Table 40 depicts per enterprise value of fixed assets owned and hired in terms of major constituents constituting the fixed assets. It is seen that G.B. Nagar was the most dominant district in the value of almost all the fixed assets owned and hired per enterprise. The major constituents of fixed assets as 'land', 'building', 'plant and machinery', 'transport', 'software and database' in G.B. Nagar had highest value except the item 'capital work in progress' where the value was highest for the district Rampur.

3.9.3 Outstanding loan by district- Table 41.1 depicts outstanding loan as on the last date of the reference year by districts. It is seen that among the major districts G.B. Nagar had the highest outstanding loan per enterprise followed by Ghaziabad, Kanpur Nagar, Rampur, Agra and Chandauli. However, lowest outstanding loan was reported from Baghpat.

3.9.4 Outstanding loan by source of loan- Statement 9 gives the percentage share of outstanding loan per enterprise by source of loan .Here 'other institutional agencies' include agencies like Khadi and Village Industries Commission (KVIC), Life Insurance Corporation (LIC), Chit Funds etc. It is seen from Statement 7 that banks mainly provided loans to unorganised manufacturing enterprises. About 74% of total loan of all enterprises was provided by the banks, borrowings made from friends and relatives were 9.4%, rest sources of loan as finance institutions, moneylenders, Business Partners etc. accounted for remaining 17% of loan disbursement.

Statement 9

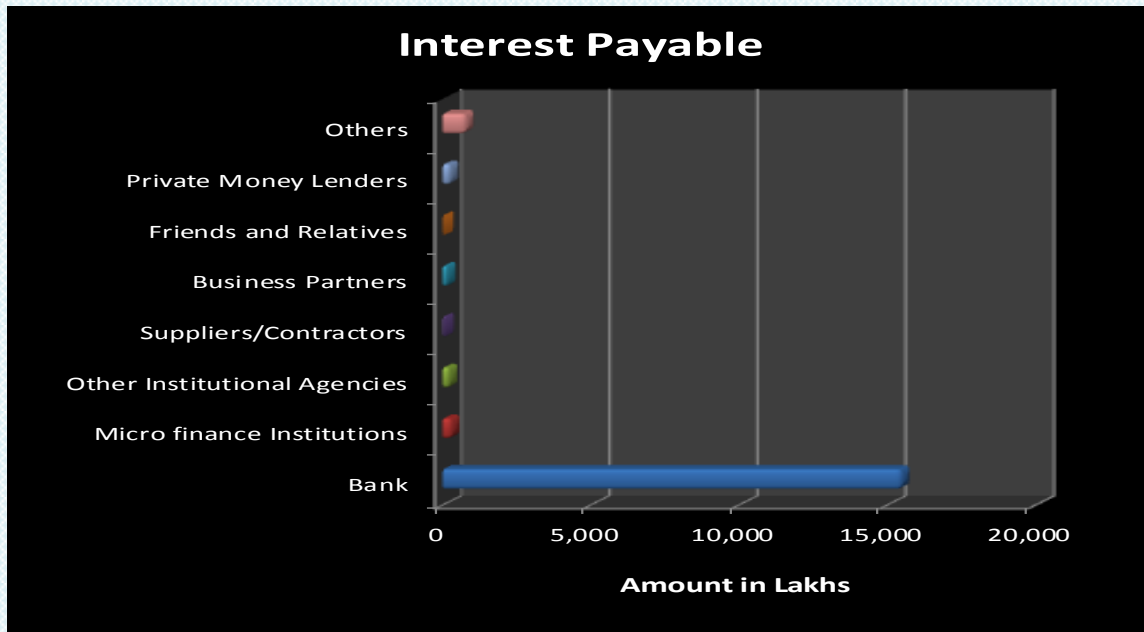

Lending agencies	Outstanding loan per enterprise	% share
Bank	781619	73.99
Micro finance Institutions	13759	1.30
Other Institutional Agencies	9644	0.91
Suppliers/Contractors	57314	5.43
Business Partners	38338	3.63
Friends and Relatives	99611	9.43
Private Money Lenders	15285	1.45
Others	40883	3.87
Total	1056453	100.00

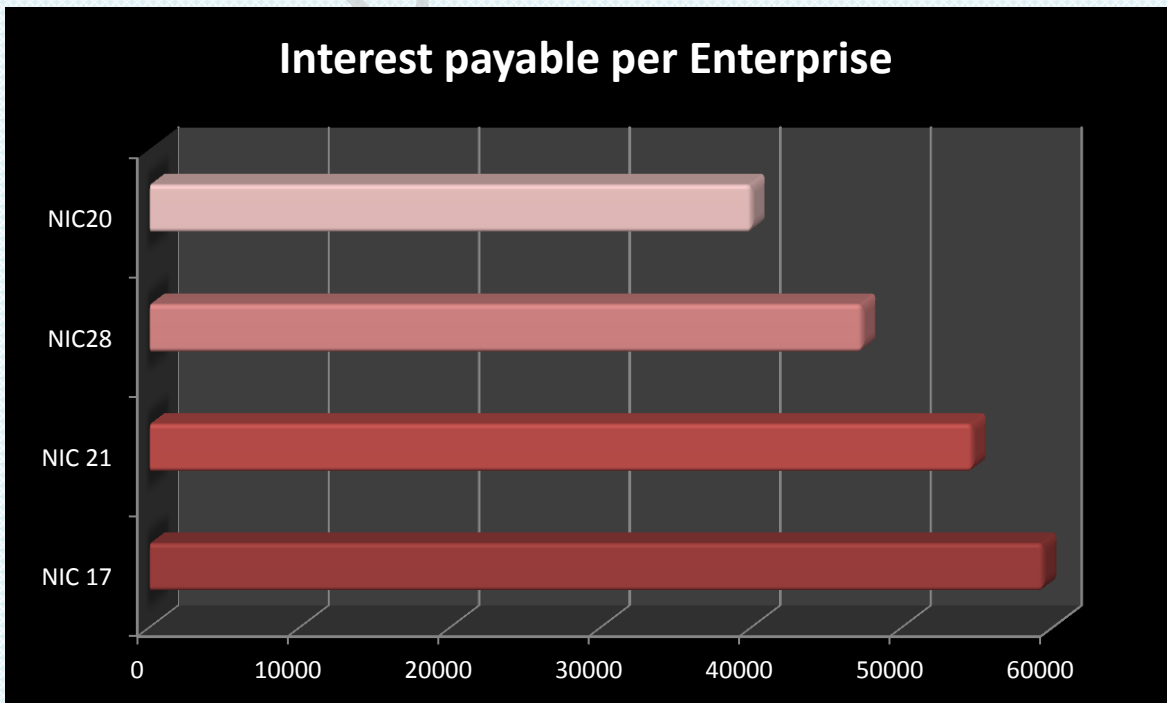

3.9.5 Outstanding loan by industry- Table 42 gives outstanding loan per enterprise as on the last date of the reference year by industry in descending order. It is seen that the enterprises pursuing 'manufacture of motor vehicles'(Ind. Div.29) had the highest outstanding loan, followed by the broad activity category 'manufacture of pharmaceuticals'(Ind. Div.21), 'manufacture of paper and paper products'(Ind. Div.17).The industry 'repair and installation of machinery and equipment' (Ind. Div.33) reported to have the least outstanding loan per enterprise.

3.9.6.1 Interest payable by districts- Table 43 gives interest payable per enterprise as on the last date of the reference year by districts. It is seen that among the major districts G.B. Nagar had the highest interest payable per enterprise followed by Ghaziabad, Rampur, Sambhal, Chandauli and Kheri. However, lowest interest payable was reported from Pilibhit.

3.9.6.2 Interest payable by loan lending agencies- Table 41.2 shows percentage of annual interest payable on loan amount per enterprise by each source agency of loan. Interest was the highest (90%) for banks as loans were mainly provided by banks followed by 'others' (4.5%),the remaining 4.5% of the total amount of interest payable was of the rest of loan lending agencies as finance institutions, moneylenders, Business Partners etc.

3.9.6.3 Interest payable by industry- Table 44 gives interest payable per enterprise as on the last date of the reference year by industry. It is seen that the enterprises pursuing 'manufacture of paper and paper products'(Ind. Div.17) had the highest interest payable, followed by the broad activity category 'manufacture of pharmaceuticals'(Ind. Div.21) , 'manufacture of machinery and equipment'(Ind. Div.28) , 'manufacture of chemical and chemical products'(Ind. Div.20).The industry 'manufacture of coke and refined petroleum products' (Ind. Div.19) reported to have the least interest payable per enterprise to lending institutions.

Chapter : Four

**Limitations of the
survey and
suggestions**

Chapter Four

Limitations of the survey and suggestions

4.1 Effectiveness of using the list frame

4.1.1 As discussed under Chapter one, the manufacturing enterprises, excluding those registered under Factories Act enlisted in the State Business Register served as the frame of the survey. At the State level, a sample of 36417 units was allotted for survey. The effectiveness of using the sample list will be judged from two counts namely (1) by studying the rate of response by the enterprises which featured in the sample list and (2) by examining the relative status of list frame enterprises, in terms of average value of key characteristics like number of workers, value of fixed assets, and GVA per enterprise.

4.1.2 Table 17 (first page) of Appendix A gives number of allotted and surveyed enterprises as well as the distribution of casualty enterprises by reason for casualty. It is seen that only 26,798 units (73.58%) were eligible for survey. The shortfall in the proportion of the eligible enterprises was attributable to the fact that among the casualty enterprises (9,619 in number), the majority were found to be non-operative or closed (4,123 in number) or not traceable (3,188 in number) and the rest became casualty because they were no longer engaged in manufacturing activities for some or other reason.

4.1.3 Statement below presents estimates of certain key characteristics namely, number of workers, owned fixed assets and GVA per enterprise by NIC code at State level for all the enterprises. It is important to note that average value per enterprise for each of these characteristics was much higher for some and abnormally low for others.

4.2 Suggestions for future

4.2.1 About 10% of the estimated total number of enterprises engaged 100 or more number of workers each and another 9% of the enterprises engaged 21 to 50 workers per enterprise. This is quite a large number. Ideally, such enterprises should be under the coverage of Factories Act 1948 / ASI (i.e. organized manufacturing sector). Possibilities need to be explored to see how best such enterprises could be covered in the Indian Statistical System for ensuring overall estimates required for national accounting purposes with increased efficiency i.e. reduced sampling error.

4.2.2 List frame needs to be updated periodically in order to eliminate the casualty enterprises. This will promote the efficacy of the future surveys undertaken.

A teal-colored graphic resembling a scroll, with a white outline and a white shadow. The scroll is partially unrolled, with the top and bottom edges curving upwards. The text is centered within the unrolled portion.

APPENDIX - A
DETAILED TABLES

Table-1 : Status of enterprises in frame, allotted and surveyed by broad activity category

NIC 2-digit code	Number of establishment in list frame	Sample Selected	Open and engaged in manufacturing activity	Closed	Traced but currently not engaged in manufacturing activity	Untraced	Others	Total Surveyed (4+5+6+7+8)

APPENDIX - B

Sample Design and Estimation Procedure

Sample Design and Estimation Procedure

1 Sampling Method adopted to draw Sample for UME Survey

1.1 Preparation of frame- Out of total number of establishments surveyed for the purpose of creating Business Register, the establishments engaged in manufacturing activities i.e. NIC3 101 to 332 excluding those registered under factories act were considered as the frame for our survey. In the process total 166008 establishments existed in the frame.

1.2 Sampling Method- From the establishments lying in the frame, 20% or minimum 4 establishments were randomly selected from each NIC3 group of each district using simple random sampling without replacement method. The simple random sampling without replacement is the method to draw sample without replacement, meaning that once an observation (i.e., case, element) has been selected into the sample, it is not available to be selected into the sample again. For the purpose the frame data set was randomized on the basis of NIC3 group in each district. After randomization process the observations were further divided into two subsets or subsamples within each NIC3 group of each district. Then a sample of 20% or minimum 4 establishments were drawn from each subset formed in each NIC3 group of each district using simple random sampling without replacement method. Therefore finally total 36417 establishments were selected as sample for survey purpose.

1.3 Preparation of Multiplier

The district wise and NIC 3 digit wise multiplier is generated to estimate the results. The number of establishment in each NIC 3 digit group of each district in frame is divided by the number of establishment actually surveyed. In the process of estimating the results the value of particular item of inquiry is multiplied by the raising factor or multiplier.

2 Estimation Procedure-

2.1 Notations used-

- L-Enterprises in the list frame
- e- Surveyed enterprise
- i- Subscript for i^{th} district
- j- Subscript for j^{th} industrial group
- k- Subscript for k^{th} enterprise
- m- Multiplier

2.2 Formula for the multiplier adopted for estimation:

$$m_{ij} = \frac{L_{ij}}{e_{ij}}$$

where m_{ij} is the multiplier of j^{th} industrial classification of i^{th} district

2.3 Estimation of a Characteristic value:

$$y_{est} = \sum_{j=101}^{332} \sum_{i=1}^{75} \{(y_k)_{ij} \times m_{ij}\}$$

Where - y_{est} is estimated value of a characteristic

$(y_k)_{ij}$ is observed value of a characteristic of k^{th} enterprise belonging to j^{th} industrial classification existing in i^{th} district.

3 Estimates of Relative Standard Error-

3.1 Relative Standard Error

The relative standard error of a data set is closely related to the standard error and can be computed from its standard deviation. Standard deviation is a measure of how tightly packed the data is around the mean. Standard error normalizes this measure in terms of the number of samples, and relative standard error expresses this result as a percentage of the mean.

The standard deviation of a data set is used to express the concentration of survey results. Less variety in the data results in a lower standard deviation. More variety is likely to result in a higher standard deviation.

The Standard Error measure indicates the extent to which a survey estimate is likely to deviate from the true population and is expressed as a number. The Relative Standard Error (RSE) is the standard error expressed as a fraction of the estimate and is usually displayed as a percentage. Estimates with a RSE of 25% or greater are subject to high sampling error and should be used with caution.

3.2 Formula to calculate Relative Standard Error:

Relative Standard Error of the overall estimate of the aggregate Y of a characteristic y -

$$RSE(\hat{Y}) = \frac{\sqrt{Var\hat{Y}}}{\hat{Y}} \times 100$$

Where - \hat{Y} is estimated value of a characteristic

Var is the variance of estimated value of a characteristic

A teal-colored graphic resembling a scroll, with a white outline and rounded corners. It features a vertical strip on the left side that looks like the edge of a rolled-up document. The text is centered within the main body of the scroll.

APPENDIX - C

Schedule canvassed and
Economic Activity Description

(✓ Appropriate column)

RURAL
URBAN

GOVERNMENT OF UTTAR PRADESH
ECONOMICS & STATISTICS DIVISION
MSME SURVEY

SCHEDULE 'UM' : UNORGANISED MANUFACTURING ENTERPRISES

[0] Descriptive identification of sample enterprise	
1.State :	4. Name of Owner :
2.District :	5. Name of Informant :
3. Village/Town Name :	6. Name and Address of the enterprise with email/mobile no. :

[1] Identification of sample enterprise									
Item no.	Item	Code				Item no.	Item	Code	
1	Serial no. of sample enterprise*					4	Sub-sample*		
2.	District*					5	Informant code		
3.	Stratum (3 digit NIC code)*					6	Survey code		

**To be copied from sample list*

Item 5: **informant code:** owner -1, manager -2, others -9

Item 6: **survey code:** original enterprise surveyed – 1, substitute surveyed -2

[2] Particulars of enterprise and background information		Item no.	Code			
Major activity during the reference month code (5-digit as per NIC 2008)		201				
Description of major activity during the reference month						
Whether pursuing mixed activity (yes-1,no-2)		202				
If yes in item 202	Principal minor activity during the reference month code (5-digit as per NIC 2008)	203				
Type of ownership (code)		204				
If item 204 is '1' to '9'	Social group of the owner/major partner (SC-1, ST-2, OBC-3, others-4)	205				

[2] Particulars of enterprise and background information	Item no.	Code
Whether the enterprise maintains any bank account/post office savings bank account (yes, in owner's name-1, yes, in enterprise's name-2, yes, in owner's and enterprise's name-3, no-4)	206	
Year of initial operation under the current owner	207	
Nature of operation (perennial-1, seasonal-2, casual-3)	208	
Number of months operated during the last 365 days (in whole numbers)	209	
Did the enterprise use computer(s) during the last 365 days? (yes-1, no-2)	210	
Did the enterprise use internet during the last 365 days? (yes-1, no-2)	211	
Whether registered under any act/authority (yes-1, no-2)	212	
Name of Act under which enterprise is registered (code)	213	Code
	213(i)	
	213(ii)	

Note 1: Mixed activity-An enterprise at a location will be treated as pursuing mixed activity if it carries out a no. of activities simultaneously and accounts for those activities are not separable. The NIC codes for those activities should be different at 2-digit level. If accounts are separable, each activity will be treated as separate enterprise.

Note 2: Major activity- It is the activity which yields maximum income (1st) /turnover (2nd) /employment (3rd) (in the order mentioned)

Codes for block 2

- **Type of ownership** : proprietary -1, partnership-2, SHGs/Trusts-3, others-9
- **Social group** : SC-1, ST-2, OBC-3, others-4
- **Nature of operation** : perennial-1, seasonal-2, casual-3
- **Act/Authority** :Shops and Establishment Act-1, Municipal Corporations / Panchayats / Local Body-2, VAT-3, KVIC/MSME -4 ,Others(specify) -5

[3] principal operating expenses during last 30 days ended on...../last calendar month ended on(Rs. in whole number)					
<i>Major Activity-Manufacturing</i>					
Main raw material consumed	Item no.	3 digit product code			Value (Rs.)
	301				
	302				
	303				
Other raw materials consumed	304				
Purchase value of the goods sold in the same condition as purchased	305				
Expenses incurred for manufacturing services	306				
Total (items 301 to 306)	307				
<i>Minor Activity</i>					
Main commodities / items purchased /consumed	Item no.	3 digit product code			Value (Rs.)
	308				
	309				
Total (items 308 to 309)	310				

[4]other operating expenses during last 30 days ended on...../last calendar month ended on(Rs. in whole number) (all other operating expenses not covered under block 3 will be recorded in this block)		
Items	Item no.	Value (Rs.)
Electricity charges	401	
Fuel and lubricant	402	
Raw material consumed for own construction of building/of furniture and fixtures	403	
Minor repair and maintenance	404	
Rental payable on fixed assets (other than land)	405	
Service charges for work done by other concern	406	
Travelling, freight and cartage	407	
Communication expenses	408	
Financial charges	409	
Total (items 401 to 409)	410	

[5] principal receipts during last 30 days ended on...../last calendar month ended on(Rs. in whole number)					
<i>Major Activity-Manufacturing</i>					
Main products and by-products manufactured	Item no.	3 digit product code			Value (Rs.)
	501				
	502				
	503				
Other products /by-products	504				
Sale value of the goods sold in the same condition as purchased (if entry is present in item 305)	505				
Receipts from manufacturing services	506				
Receipts from other services	507				
Total (items 501 to 507)	508				
Opening stock of semi-finished goods	509				
Closing stock of semi-finished goods	510				
Change in stock of semi-finished goods(item510-item 509) put (-) sign in case of negative value	511				
Total(item508+item 511)	512				
<i>Minor Activity</i>					
Main commodities / items sold	Item no.	3 digit product code			Value (Rs.)
	513				
	514				
Total (items 513 to 514)	515				

[6] Calculation of gross value added during last 30 days ended on...../last calendar month ended on(Rs. in whole number)		
Item	Item code	Value (Rs.)
Total receipts : <i>(item 512+item 515)</i>	601	
Total operating expenses : <i>(item 307+item 310+item 410)</i>	602	
Distributive expenses <i>(if included in the receipt figure)</i>	603	
Toll	604	
Taxes on products: <i>(VAT, Service Tax, Excise duty, etc.)</i>	605	
Gross Value Added : <i>(item 601-item 602-item 603-item 604-item 605) (put negative sign in case of negative value)</i>	606	
Taxes on production <i>(stamp duty, recurrent taxes on land, buildings or other structure, business or professional license fees, permits, entry tax, road tax, PUC certificate (pollution) etc.)</i>	607	

[7] Employment particulars of the enterprise during last 30 days ended on...../last calendar month ended on (Rs. in whole number)						
Type of worker	Item no.	Average Number of Workers			Compensation to workers	
		Total	Male	Female	Salary, wages, hra, bonus etc. <i>(directly payable to the worker)</i>	Contribution to insurance, pf, canteen, child care centre etc. social security schemes <i>(average for a month)</i>
Working owner	701					
Formal hired Worker	702					
Informal hired worker	703					
Other worker	704					
Total (701 to 704)	705					

[8] Land and Fixed assets owned and hired as on the last date of reference year and monthly rent/rental payable on hired assets (Rs. in whole number)					
Type of assets	Item no.	Market value of assets		Net addition to owned asset during last 365 days/last year	Monthly rent/rental payable on hired assets
		Owned	Hired		
Land	801				
Building	802				
Plant & Machinery	803				
Transport equip.	804				
Tools & other fixed assets	805				
S/w and database	806				
ICT equip.	807				
Capital work in progress	808				
Total (items 801 to 808)	809				

[9] Loan outstanding as on last date of reference year. (Rs. in whole number)			
Source of loan	Item no.	Amount Outstanding	Interest payable during the last 30 days/last calendar month.
Banks	901		
Micro finance Institutions	902		
Other Institutional Agencies	903		
Suppliers/Contractors	904		
Business Partners	905		
Friends and Relatives	906		
Private Money Lenders	907		
Others	908		
Total (item 901 to 908)	909		

[10] Difficulties faced by Entrepreneur in proper running of enterprise			
Sl. No.	Description of Difficulties	Item code	code
(a)	Shortage of electricity (yes-not sufficient supply-1, yes-low voltage problem-2, no-3)	1001	
(b)	Shortage of raw material (yes-1, no-2)	1002	
(c)	Non-availability of man power (yes-1, no-2)	1003	
(d)	Lack of know how (yes-1, no-2)	1004	
(e)	Difficulty in getting financial assistance from financial institutions (yes-1, no-2)	1005	
(f)	Others (specify)		
(i)			
(ii)			
(iii)

Date:

NIC-2008 3-digit code along with the description

NIC-3 digit code 2008	Description
101	Processing and preserving of meat
102	Processing and preserving of fish, crustaceans and molluscs
103	Processing and preserving of fruit and vegetables
104	Manufacture of vegetable and animal oils and fats
105	Manufacture of dairy products
106	Manufacture of grain mill products, starches and starch products
107	Manufacture of other food products
108	Manufacture of prepared animal feeds
110	Manufacture of beverages
120	Manufacture of tobacco products
131	Spinning, weaving and finishing of textiles
139	Manufacture of other textiles
141	Manufacture of wearing apparel, except fur apparel
142	Manufacture of articles of fur
143	Manufacture of knitted and crocheted apparel
151	Tanning and dressing of leather; manufacture of luggage, handbags, saddlery and harness; dressing and dyeing of fur
152	Manufacture of footwear
161	Sawmilling and planing of wood
162	Manufacture of products of wood, cork, straw and plaiting materials
170	Manufacture of paper and paper products
181	Printing and service activities related to printing
182	Reproduction of recorded media
191	Manufacture of coke oven products
192	Manufacture of refined petroleum products
201	Manufacture of basic chemicals, fertilizers and nitrogen compounds, plastics and synthetic rubber in primary forms
202	Manufacture of other chemical products
203	Manufacture of man-made fibres
210	Manufacture of pharmaceuticals, medicinal chemical and botanical products
221	Manufacture of rubber products
222	Manufacture of plastics products
231	Manufacture of glass and glass products
239	Manufacture of non-metallic mineral products n.e.c.
241	Manufacture of basic iron and steel
242	Manufacture of basic precious and other non-ferrous metals
243	Casting of metals
<i>Continued...</i>	
251	Manufacture of structural metal products, tanks, reservoirs and steam generators

NIC-2008 3-digit code along with the description

NIC-3 digit code 2008	Description
252	Manufacture of weapons and ammunition
259	Manufacture of other fabricated metal products; metalworking service activities
261	Manufacture of electronic components and boards
262	Manufacture of computers and peripheral equipment
263	Manufacture of communication equipment
264	Manufacture of consumer electronics
265	Manufacture of measuring, testing, navigating and control equipment; watches and clocks
266	Manufacture of irradiation, electromedical and electrotherapeutic equipment
267	Manufacture of optical instruments and photographic equipment
268	Manufacture of magnetic and optical media
271	Manufacture of electric motors, generators, transformers and electricity distribution and control apparatus
272	Manufacture of batteries and accumulators
273	Manufacture of wiring and wiring devices
274	Manufacture of electric lighting equipment
275	Manufacture of domestic appliances
279	Manufacture of other electrical equipment
281	Manufacture of general-purpose machinery
282	Manufacture of special-purpose machinery
291	Manufacture of motor vehicles
292	Manufacture of bodies (coachwork) for motor vehicles; manufacture of trailers and semi-trailers
293	Manufacture of parts and accessories for motor vehicles
301	Building of ships and boats
302	Manufacture of railway locomotives and rolling stock
303	Manufacture of air and spacecraft and related machinery
304	Manufacture of military fighting vehicles
309	Manufacture of transport equipment n.e.c.
310	Manufacture of furniture
321	Manufacture of jewellery, bijouterie and related articles
322	Manufacture of musical instruments
323	Manufacture of sports goods
324	Manufacture of games and toys
325	Manufacture of medical and dental instruments and supplies
329	Other manufacturing n.e.c.
331	Repair of fabricated metal products, machinery and equipment
332	Installation of industrial machinery and equipment
