Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.

Note: If a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', and status of treatment taken for different categories of these disabilities are different then the person will be counted once against each of such 'status of treatment taken'. However if a person has more than one type of locomotor disability or more than one type of mental retardation/intellectual disability or more than one 'other type of disability', but 'status of treatment taken' for each of such broad type of disability is same, the person will be counted only once against that 'status of treatment taken'. Similarly 'status of treatment taken' will be determined for broad type of disability 'any disability'.
